

1

00:00:00,500 --> 00:00:04,520

If we're really careful, should we... should we go to visit an asteroid?

2

00:00:04,520 --> 00:00:05,450

Yes.

3

00:00:05,450 --> 00:00:08,559

And how do you think we would capture an asteroid?

4

00:00:08,559 --> 00:00:15,559

We could probably catch an asteroid with a lasso like we did cows with a lasso.

5

00:00:17,210 --> 00:00:21,460

That's right! We're from Texas and that's how we catch cows. And so we can definitely

6

00:00:21,460 --> 00:00:24,090

catch asteroids with a lasso.

7

00:00:24,090 --> 00:00:28,180

It's pretty simple. Going to an asteroid is better. Learning more about these celestial

8

00:00:28,180 --> 00:00:31,720

bodies will help us protect our home planet, serve as proving ground for missions deeper

9

00:00:31,720 --> 00:00:34,690

into space and learn more about our solar system.
