

1
00:00:01,067 --> 00:00:04,503
>> Hi, I'm Nichelle Nichols.

2
00:00:04,503 --> 00:00:07,440
Years ago, I told you
about NASA's new idea

3
00:00:07,440 --> 00:00:11,277
for a space ship called
the space shuttle.

4
00:00:11,277 --> 00:00:13,345
It was an exciting time

5
00:00:13,345 --> 00:00:18,717
and we showed what we can
accomplish in low earth orbit.

6
00:00:18,717 --> 00:00:24,256
During the shuttle era, we built
the International Space Station;

7
00:00:24,256 --> 00:00:28,828
astronauts orbit the earth,
conducting scientific research

8
00:00:28,828 --> 00:00:35,267
in space for the
benefit of all humankind.

9
00:00:35,267 --> 00:00:43,109
And now, there's a Orion,
NASA's newest space vehicle,

10
00:00:43,109 --> 00:00:48,047
rocketed off the earth by
NASA's space launch system.

11
00:00:48,047 --> 00:00:53,719

The Orion spacecraft will
be able to take us deeper

12

00:00:53,719 --> 00:00:57,990
into the Solar System than
we have ever gone before

13

00:00:57,990 --> 00:01:03,729
so once again, we're about
to begin a whole new era

14

00:01:03,729 --> 00:01:11,036
of exploration with endless possibilities,

15

00:01:11,036 --> 00:01:13,205
where we can boldly go.

16

00:01:13,205 --> 00:01:16,041
Discover more about
NASA's new path

17

00:01:16,041 --> 00:01:21,580
into the final frontier
right here at this website.
