

#imonboard

1
00:00:02,334 --> 00:00:07,473
>> I would like to
introduce you to Orion.

2
00:00:07,473 --> 00:00:10,342
This is NASA's newest
spacecraft.

3
00:00:10,342 --> 00:00:12,611
Unlike the Space Shuttle,
which was designed

4
00:00:12,611 --> 00:00:15,815
for low Earth orbit, Orion
is meant to take humans

5
00:00:15,815 --> 00:00:18,717
into deep space for
long-duration missions

6
00:00:18,717 --> 00:00:21,287
into our solar system.

7
00:00:21,287 --> 00:00:23,589
To get off the Earth,
Orion will launch

8
00:00:23,589 --> 00:00:27,193
on a massive rocket called
the Space Launch System.

9
00:00:27,193 --> 00:00:32,298
Will shoot Orion into space
like, well, like an arrow.

10
00:00:32,298 --> 00:00:34,867
There are many possibilities
for Orion.

11

00:00:34,867 --> 00:00:37,169

It can travel to an asteroid

12

00:00:37,169 --> 00:00:40,639

or even extend a human
presence to Mars.

13

00:00:40,639 --> 00:00:44,443

It's an exciting new era
for human space exploration

14

00:00:44,443 --> 00:00:47,146

with new powerful
rockets, manned spaceships,

15

00:00:47,146 --> 00:00:48,714

and amazing discoveries to make.

16

00:00:48,714 --> 00:00:53,119

No matter who you
are, you can find
