

 @astro\_reid

1  
00:00:10,150 --> 00:00:08,950  
hello my name is lyla

2  
00:00:20,550 --> 00:00:10,160  
and i

3  
00:00:22,390 --> 00:00:20,560  
um and my question is i'm wanting to

4  
00:00:27,670 --> 00:00:22,400  
know

5  
00:00:32,069 --> 00:00:29,990  
one of my favorite questions so i have

6  
00:00:34,870 --> 00:00:32,079  
not seen any aliens some people have

7  
00:00:37,830 --> 00:00:34,880  
said i'm an alien but i don't think i am

8  
00:00:39,830 --> 00:00:37,840  
but let me just tell you this when we go

9  
00:00:41,670 --> 00:00:39,840  
around the back side of the earth so the

10  
00:00:44,069 --> 00:00:41,680  
the earth is blocking the sun and we

11  
00:00:45,670 --> 00:00:44,079  
have true darkness up here and i look

12  
00:00:47,430 --> 00:00:45,680  
out at the stars

13  
00:00:49,510 --> 00:00:47,440

there are so

14

00:00:51,510 --> 00:00:49,520

many stars out there and you have to

15

00:00:53,029 --> 00:00:51,520

think each star has a few planets

16

00:00:53,830 --> 00:00:53,039

orbiting around it

17

00:00:55,990 --> 00:00:53,840

and

18

00:00:57,430 --> 00:00:56,000

there is no way we are alone there has

19

00:00:59,110 --> 00:00:57,440

to be something else out there and there

20

00:01:01,270 --> 00:00:59,120

may be even in our solar system around

21

00:01:03,750 --> 00:01:01,280

the moons of jupiter and saturn or

22

00:01:05,590 --> 00:01:03,760

markers of life previously on mars so to

23

00:01:06,950 --> 00:01:05,600

me this is the the great humid adventure
