

 @astro_reid

1
00:00:09,669 --> 00:00:07,590

hi astronaut wise man

2
00:00:11,910 --> 00:00:09,679

my name is leon i'm from houston texas

3
00:00:13,190 --> 00:00:11,920

and my question to you is what are the

4
00:00:15,110 --> 00:00:13,200

discoveries that you have done in the

5
00:00:16,630 --> 00:00:15,120

iss or what discoveries are you planning

6
00:00:18,150 --> 00:00:16,640

to do while being in the iss and the

7
00:00:19,670 --> 00:00:18,160

time you have left

8
00:00:22,070 --> 00:00:19,680

thank you

9
00:00:23,750 --> 00:00:22,080

so that's a great question

10
00:00:25,990 --> 00:00:23,760

as an astronaut up here i am really an

11
00:00:27,830 --> 00:00:26,000

operator so there there are experiments

12
00:00:29,349 --> 00:00:27,840

going on all around me right now even

13
00:00:30,950 --> 00:00:29,359

though i'm not touching them we have a

14

00:00:32,790 --> 00:00:30,960

glove box set up for some activities

15

00:00:35,110 --> 00:00:32,800

tomorrow we have some flame research

16

00:00:37,430 --> 00:00:35,120

that's going on here we have robonaut

17

00:00:39,350 --> 00:00:37,440

over here this is a cardiovascular

18

00:00:42,630 --> 00:00:39,360

checkout system for my health and to see

19

00:00:44,150 --> 00:00:42,640

how my body's adapting so really

20

00:00:45,750 --> 00:00:44,160

my job up here is to implement the

21

00:00:47,430 --> 00:00:45,760

science that the investigators in the

22

00:00:48,549 --> 00:00:47,440

earth want me to so

23

00:00:49,910 --> 00:00:48,559

i'm sure there have been great

24

00:00:51,189 --> 00:00:49,920

discoveries

25

00:00:53,270 --> 00:00:51,199

i can tell you every time i play with

26

00:00:54,950 --> 00:00:53,280

water that's always a great discovery

27

00:00:56,389 --> 00:00:54,960

and we've done some stuff back in the

28

00:00:57,350 --> 00:00:56,399

japanese segment the last two or three

29

00:00:59,189 --> 00:00:57,360

weeks they're gonna have amazing

30

00:01:00,869 --> 00:00:59,199

discoveries but all that data has got to

31

00:01:02,709 --> 00:01:00,879

get down to the ground all the smart

32

00:01:04,710 --> 00:01:02,719

people have to crunch it and then in the

33

00:01:06,950 --> 00:01:04,720

end who knows maybe there will be a cure
