

 @astro_reid

1
00:00:09,030 --> 00:00:06,869
hello reed this is click from san

2
00:00:10,870 --> 00:00:09,040
francisco my question is what part of

3
00:00:13,350 --> 00:00:10,880
the earth has been impacted the most by

4
00:00:15,190 --> 00:00:13,360
humans in your opinion that you've seen

5
00:00:17,189 --> 00:00:15,200
either the water or the land some place

6
00:00:18,870 --> 00:00:17,199
where the you can look down and say wow

7
00:00:20,550 --> 00:00:18,880
you can definitely see the influence

8
00:00:22,630 --> 00:00:20,560
that people have had on this landscape

9
00:00:24,470 --> 00:00:22,640
or in this part of the world

10
00:00:26,150 --> 00:00:24,480
very good question so as we as we go

11
00:00:28,470 --> 00:00:26,160
around the planet you can see quite a

12
00:00:29,830 --> 00:00:28,480
bit uh you can definitely see cities no

13
00:00:31,349 --> 00:00:29,840

doubt when you're flying over a really

14

00:00:33,830 --> 00:00:31,359

populated city it just kind of looks

15

00:00:34,709 --> 00:00:33,840

like a smudge if you get out a nice big

16

00:00:36,870 --> 00:00:34,719

lens

17

00:00:38,709 --> 00:00:36,880

you can see the streets and stuff but

18

00:00:41,030 --> 00:00:38,719

and then also all the farmlands you can

19

00:00:42,630 --> 00:00:41,040

see how structured farming is especially

20

00:00:44,790 --> 00:00:42,640

out in deserts where we've done

21

00:00:48,229 --> 00:00:44,800

irrigation but the thing that really

22

00:00:49,830 --> 00:00:48,239

strikes me is dams you can spot a dam

23

00:00:51,510 --> 00:00:49,840

instantly from up here you can see the

24

00:00:53,189 --> 00:00:51,520

river turn into a lake turn into a

25

00:00:55,590 --> 00:00:53,199

reservoir and turn back into a river

26

00:00:57,189 --> 00:00:55,600

those are just so clear and there there

27

00:00:58,389 --> 00:00:57,199

are thousands all over the world there's
