

A professional video camera is the central focus, its viewfinder displaying a space scene with a purple astronaut and a white astronaut. The camera is mounted on a rig. In the background, a man in a blue flight suit is partially visible, looking towards the camera.

SCOTT KELLY ASTRONAUT

1
00:00:10,390 --> 00:00:09,509
you know people sometimes look at you

2
00:00:11,830 --> 00:00:10,400
know

3
00:00:14,470 --> 00:00:11,840
how do you go from this kid to an

4
00:00:16,870 --> 00:00:14,480
astronaut that's a pretty

5
00:00:19,029 --> 00:00:16,880
big step but in

6
00:00:22,070 --> 00:00:19,039
reality it's really a bunch of little

7
00:00:30,470 --> 00:00:22,080
steps that kind of build upon

8
00:00:34,549 --> 00:00:33,110
my brother and i were explorers at a

9
00:00:36,470 --> 00:00:34,559
very young age

10
00:00:38,950 --> 00:00:36,480
spent a lot of time outside a lot of

11
00:00:40,630 --> 00:00:38,960
time at the jersey shore as we got older

12
00:00:42,150 --> 00:00:40,640
when i went to college i kind of took

13
00:00:46,950 --> 00:00:42,160

that to the next level going to a

14

00:00:50,790 --> 00:00:48,790

we had this 800-foot ship that we would

15

00:00:52,869 --> 00:00:50,800

take to europe every summer

16

00:00:56,229 --> 00:00:52,879

it was a world war ii

17

00:00:58,709 --> 00:00:56,239

troop and cargo vessel it did have that

18

00:01:00,229 --> 00:00:58,719

kind of romantic aspect to it and that

19

00:01:01,990 --> 00:01:00,239

just reminded me of what it must have

20

00:01:07,109 --> 00:01:02,000

been like on a sailing vessel hundreds

21

00:01:10,789 --> 00:01:09,270

i think operating the vessel just the

22

00:01:12,469 --> 00:01:10,799

kind of the methodology and the

23

00:01:14,789 --> 00:01:12,479

attention to detail you needed to do

24

00:01:16,630 --> 00:01:14,799

that helped me when i went into the navy

25

00:01:18,870 --> 00:01:16,640

really helped me do well in flight

26

00:01:21,030 --> 00:01:18,880

school which then helped me get selected

27

00:01:23,990 --> 00:01:21,040

to fly jets which then transitioned to

28

00:01:26,390 --> 00:01:24,000

flying fighters the f-14 tomcat

29

00:01:31,270 --> 00:01:26,400

later becoming a test pilot and an
