

1
00:00:39,140 --> 00:01:34,910
stop nobody like I gotta go

2
00:01:58,520 --> 00:01:55,580
what don't want to drown him feel really

3
00:02:01,830 --> 00:01:58,530
it's got a couple of questions from me

4
00:02:03,690 --> 00:02:01,840
naevius NASA television as the day's

5
00:02:05,940 --> 00:02:03,700
wind down toward launch what are you

6
00:02:08,639 --> 00:02:05,950
savoring the most on a day-to-day basis

7
00:02:11,580 --> 00:02:08,649
and looking forward the most before you

8
00:02:13,020 --> 00:02:11,590
leave the planet for a year and since it

9
00:02:15,720 --> 00:02:13,030
is interesting question because it's

10
00:02:17,130 --> 00:02:15,730
different this time than my like three

11
00:02:19,650 --> 00:02:17,140
previous flights because all those were

12
00:02:21,180 --> 00:02:19,660
different being the pilot on a Hubble

13
00:02:22,530 --> 00:02:21,190

telescope mission on the shuttle then

14

00:02:24,470 --> 00:02:22,540

the commander of the space shuttle to

15

00:02:26,850 --> 00:02:24,480

the space station my last flight was a

16

00:02:28,920 --> 00:02:26,860

you know I'm the soy used for a long

17

00:02:30,900 --> 00:02:28,930

duration flight so you know this one is

18

00:02:33,210 --> 00:02:30,910

a lot similar to that except it's longer

19

00:02:35,280 --> 00:02:33,220

so it'll be harder so you know the

20

00:02:37,050 --> 00:02:35,290

anticipation is different and I think

21

00:02:39,390 --> 00:02:37,060

you know probably a little bit later in

22

00:02:41,850 --> 00:02:39,400

a week it will become you know even more

23

00:02:43,140 --> 00:02:41,860

real so definitely a different

24

00:02:45,630 --> 00:02:43,150

experience as far as you know what I

25

00:02:47,640 --> 00:02:45,640

look forward to in the next week or you

26
00:02:49,260 --> 00:02:47,650
know six days just seeing my friends and

27
00:02:59,200 --> 00:02:49,270
family that are coming down here that

28
00:02:59,210 --> 00:03:27,570
you check in them together

29
00:03:34,300 --> 00:03:30,730
scott kelly scott it's got to feel real

30
00:03:35,949 --> 00:03:34,310
now your thoughts on your inspection of

31
00:03:37,180 --> 00:03:35,959
your spacecraft for the last time until

32
00:03:39,760 --> 00:03:37,190
launch night and your level of

33
00:03:42,729 --> 00:03:39,770
excitement it's looks ready to go and

34
00:03:45,490 --> 00:03:42,739
obviously we're excited great to be here

35
00:03:49,120 --> 00:03:45,500
think we're four days and about 14 hours

36
00:03:52,690 --> 00:03:49,130
from launch so it's an exciting time
