

1
00:00:14,880 --> 00:00:47,910
language

2
00:00:47,920 --> 00:01:20,550
doing good

3
00:01:25,429 --> 00:01:22,230
congratulations on your successful

4
00:01:30,310 --> 00:01:27,510
we're happy to welcome you

5
00:01:33,590 --> 00:01:30,320
on our kazakh soil how many experiments

6
00:01:37,990 --> 00:01:34,550
well

7
00:01:40,630 --> 00:01:38,000
i'm talking about the entire crew

8
00:01:44,710 --> 00:01:40,640
the time we spent was long and our

9
00:01:52,830 --> 00:01:47,670
not just to show how cool we live off

10
00:01:56,789 --> 00:01:54,789
and i know that

11
00:01:58,709 --> 00:01:56,799
tyree and samantha and probably samantha

12
00:02:00,870 --> 00:01:58,719
most of all

13
00:02:03,030 --> 00:02:00,880

spend her own time

14

00:02:05,590 --> 00:02:03,040

even at night

15

00:02:14,070 --> 00:02:05,600

she would do whatever she could

16

00:02:14,080 --> 00:02:21,510

anton please pass your mic to tyrion

17

00:02:26,070 --> 00:02:23,589

i don't even know how many experiments

18

00:02:28,229 --> 00:02:26,080

every single day

19

00:02:30,150 --> 00:02:28,239

it's very intensive

20

00:02:32,070 --> 00:02:30,160

so nasa astronaut terry verts freshly

21

00:02:34,150 --> 00:02:32,080

arrived from space welcome back welcome

22

00:02:36,309 --> 00:02:34,160

back to earth first of all um how does

23

00:02:38,390 --> 00:02:36,319

that ride down how you feeling right now

24

00:02:39,990 --> 00:02:38,400

that was an amazing ride i've had the

25

00:02:41,430 --> 00:02:40,000

opportunity to do a lot of interesting

26
00:02:42,710 --> 00:02:41,440
things but i've never done anything like

27
00:02:45,110 --> 00:02:42,720
that

28
00:02:46,869 --> 00:02:45,120
the soyuz it worked great

29
00:02:47,990 --> 00:02:46,879
you could see the earth going by you

30
00:02:50,470 --> 00:02:48,000
could see the different parts of south

31
00:02:52,390 --> 00:02:50,480
america and africa and pick out the Nile

32
00:02:53,670 --> 00:02:52,400
river and the coastline and the jungle

33
00:02:55,990 --> 00:02:53,680
and stuff it was it was pretty neat to

34
00:02:57,190 --> 00:02:56,000
see that and then when the separation

35
00:02:59,270 --> 00:02:57,200
happened you could see some of the

36
00:03:01,350 --> 00:02:59,280
covering of the vehicle come off and it

37
00:03:03,270 --> 00:03:01,360
kind of hung around for a while and then

38
00:03:04,710 --> 00:03:03,280

floated off so there was a lot of things

39

00:03:06,390 --> 00:03:04,720

happening when the parachute came out

40

00:03:08,390 --> 00:03:06,400

the vehicle was tumbling

41

00:03:09,670 --> 00:03:08,400

like crazy for about 20 seconds before

42

00:03:12,309 --> 00:03:09,680

it settled out

43

00:03:14,309 --> 00:03:12,319

and um of course the landing is a big

44

00:03:16,070 --> 00:03:14,319

giant bang and uh

45

00:03:18,149 --> 00:03:16,080

but it was good there was nothing there

46

00:03:19,830 --> 00:03:18,159

was no damage i felt fine and it was a

47

00:03:21,509 --> 00:03:19,840

pretty exciting ride home

48

00:03:23,750 --> 00:03:21,519

so you were there for the pmm move and

49

00:03:25,430 --> 00:03:23,760

you did three spacewalks earlier this

50

00:03:26,710 --> 00:03:25,440

year and all that's getting us ready for

51
00:03:28,229 --> 00:03:26,720
commercial crew and the international

52
00:03:29,830 --> 00:03:28,239
docking adapters what was it like to be

53
00:03:31,509 --> 00:03:29,840
part of those evas

54
00:03:33,430 --> 00:03:31,519
it was exciting you know the first

55
00:03:35,110 --> 00:03:33,440
decade or so of the station program was

56
00:03:37,030 --> 00:03:35,120
assembly and then we moved into

57
00:03:38,149 --> 00:03:37,040
utilization but i'm kind of looking

58
00:03:39,670 --> 00:03:38,159
right now we're in a period of

59
00:03:42,070 --> 00:03:39,680
reconfiguration and we're moving a lot

60
00:03:44,149 --> 00:03:42,080
of things around and it was just for

61
00:03:45,670 --> 00:03:44,159
lack of a better word it was cool to be

62
00:03:47,589 --> 00:03:45,680
there for right in the middle of doing

63
00:03:49,670 --> 00:03:47,599

spacewalks and a lot of also work on the

64

00:03:51,589 --> 00:03:49,680

inside and outside of the station to get

65

00:03:53,429 --> 00:03:51,599

ready for not only crew vehicles but

66

00:03:56,710 --> 00:03:53,439

cargo vehicles um

67

00:03:58,070 --> 00:03:56,720

in in a in a more intensive way so it's

68

00:03:59,990 --> 00:03:58,080

exciting

69

00:04:01,670 --> 00:04:00,000

and the international space station

70

00:04:03,429 --> 00:04:01,680

you're part of an international crew you

71

00:04:05,110 --> 00:04:03,439

just came home with anton a russian

72

00:04:06,470 --> 00:04:05,120

cosmonaut and samantha an italian

73

00:04:08,309 --> 00:04:06,480

astronaut what was it like being up

74

00:04:09,429 --> 00:04:08,319

there with them the whole time

75

00:04:10,789 --> 00:04:09,439

you know i just had to say goodbye to

76

00:04:13,270 --> 00:04:10,799

anton he's on his way to moscow right

77

00:04:16,069 --> 00:04:13,280

now and that was sad we've been together

78

00:04:17,749 --> 00:04:16,079

200 days yes in space but three years

79

00:04:19,909 --> 00:04:17,759

including training so

80

00:04:21,509 --> 00:04:19,919

um and we were with them every day you

81

00:04:23,350 --> 00:04:21,519

know for a lot of the day every day and

82

00:04:25,110 --> 00:04:23,360

it was great uh

83

00:04:26,710 --> 00:04:25,120

in the in the bus they were both leaning

84

00:04:28,950 --> 00:04:26,720

on me and so it's going to be kind of

85

00:04:30,870 --> 00:04:28,960

hard to say goodbye to this giant

86

00:04:32,469 --> 00:04:30,880

experience of coming back to earth you

87

00:04:34,150 --> 00:04:32,479

land you're getting used as dizzy right

88

00:04:35,590 --> 00:04:34,160

now and then all of a sudden the people

89

00:04:36,950 --> 00:04:35,600

you've been with just scatter to the

90

00:04:40,230 --> 00:04:36,960

four winds so

91

00:04:42,390 --> 00:04:40,240

it's a it's a lot happening in one day

92

00:04:45,189 --> 00:04:42,400

what is the first impression just when

93

00:04:47,350 --> 00:04:45,199

you get back on earth

94

00:04:49,590 --> 00:04:47,360

the first thing is really the weight i

95

00:04:51,110 --> 00:04:49,600

mean you know your body weighs so much

96

00:04:53,270 --> 00:04:51,120

everything that you try to hold in your

97

00:04:55,270 --> 00:04:53,280

hands way so much you're trying to you

98

00:04:56,950 --> 00:04:55,280

know just just reach with your hand that

99

00:04:58,550 --> 00:04:56,960

it weighs so much

100

00:05:00,070 --> 00:04:58,560

you know we were

101
00:05:01,670 --> 00:05:00,080
you know just starting the re-entry and

102
00:05:04,150 --> 00:05:01,680
i was looking at the number of g's and

103
00:05:06,550 --> 00:05:04,160
we were like at you know one two g's and

104
00:05:07,990 --> 00:05:06,560
i already felt like it was six or seven

105
00:05:11,749 --> 00:05:08,000
it just felt so much and then we went

106
00:05:13,350 --> 00:05:11,759
all the way up to 4.1 and i mean such a

107
00:05:15,350 --> 00:05:13,360
different feeling after being weightless

108
00:05:17,830 --> 00:05:15,360
and floating for six months and when

109
00:05:20,150 --> 00:05:17,840
they opened the capsule the air did

110
00:05:21,909 --> 00:05:20,160
you feel something special

111
00:05:24,629 --> 00:05:21,919
even before that actually we equalized

112
00:05:25,670 --> 00:05:24,639
pressure with the uh with the atmosphere

113
00:05:28,790 --> 00:05:25,680

um

114

00:05:31,029 --> 00:05:28,800

high up high at altitude and so uh even

115

00:05:32,870 --> 00:05:31,039

at that point uh we you know there was

116

00:05:34,310 --> 00:05:32,880

some uh some

117

00:05:35,749 --> 00:05:34,320

i don't know how to describe it but some

118

00:05:38,310 --> 00:05:35,759

feeling that it was real air that was

119

00:05:40,230 --> 00:05:38,320

coming in and then as we came down even

120

00:05:41,670 --> 00:05:40,240

before they opened the hatch i think we

121

00:05:43,510 --> 00:05:41,680

talked to each other hey can you can you

122

00:05:45,510 --> 00:05:43,520

smell the the grass i mean it's been an

123

00:05:48,070 --> 00:05:45,520

amazing day i mean kazakhstan covered in
