

THE ONE YEAR MISSION

The NASA logo, featuring the word "NASA" in a bold, sans-serif font, is centered within a white circular emblem. The emblem is set against a background of a starry sky with a black orbital path. The entire graphic is overlaid on a composite background of a space station, a planet, and Earth.

NASA

NARRATED BY
BILLY DEE WILLIAMS

1
00:00:10,790 --> 00:00:06,470
imagine what it would be like if you

2
00:00:13,030 --> 00:00:10,800
left the earth for an entire year

3
00:00:17,269 --> 00:00:13,040
away from your friends your family

4
00:00:19,590 --> 00:00:17,279
everything you love and care about

5
00:00:22,390 --> 00:00:19,600
two of earth's bravest are making that

6
00:00:24,950 --> 00:00:22,400
sacrifice right now

7
00:00:27,269 --> 00:00:24,960
they've traveled beyond our atmosphere

8
00:00:30,310 --> 00:00:27,279
for a year-long stay aboard the

9
00:00:32,310 --> 00:00:30,320
international space station

10
00:00:34,229 --> 00:00:32,320
here they'll study the effects of

11
00:00:35,750 --> 00:00:34,239
prolonged weightlessness on the human

12
00:00:38,229 --> 00:00:35,760
body

13
00:00:40,950 --> 00:00:38,239

their discoveries will allow humans to

14

00:00:42,389 --> 00:00:40,960

travel farther into space than ever

15

00:00:44,630 --> 00:00:42,399

before

16

00:00:46,389 --> 00:00:44,640

the conditions are harsh

17

00:00:48,950 --> 00:00:46,399

the risk is great

18

00:00:50,869 --> 00:00:48,960

but the potential payoff

19

00:00:53,350 --> 00:00:50,879

is huge

20

00:00:54,950 --> 00:00:53,360

we could stay on earth but that's not

21

00:00:58,630 --> 00:00:54,960

who we are

22

00:01:01,750 --> 00:00:58,640

we're scientists and we're explorers

23

00:01:05,030 --> 00:01:01,760

we'll always venture into the unknown

24

00:01:06,469 --> 00:01:05,040

and seek to expand our knowledge

25

00:01:09,030 --> 00:01:06,479

one day soon

26

00:01:11,109 --> 00:01:09,040

humans will step foot on mars

27

00:01:13,590 --> 00:01:11,119

and it's the science being conducted

28

00:01:14,630 --> 00:01:13,600

today aboard the international space

29

00:01:17,990 --> 00:01:14,640

station

30

00:01:22,310 --> 00:01:18,000

that will help us get there

31

00:01:24,789 --> 00:01:22,320

we explore the universe because we must

32

00:01:27,350 --> 00:01:24,799

because humankind's future doesn't
