

1  
00:00:50,790 --> 00:00:48,069  
what am i gonna do with you

2  
00:00:52,069 --> 00:00:50,800  
in your earring where'd the other one go

3  
00:01:03,910 --> 00:00:52,079  
suppose you don't know where mommy's

4  
00:01:03,920 --> 00:01:16,070  
hurry up come on

5  
00:01:16,080 --> 00:01:40,870  
i'll help you find your keys mommy

6  
00:01:40,880 --> 00:02:34,550  
okay

7  
00:02:34,560 --> 00:02:43,110  
i love you bye

8  
00:02:57,589 --> 00:02:47,110  
dig your hand in the land and listen to

9  
00:03:01,350 --> 00:02:59,270  
since temperature records began the

10  
00:03:03,430 --> 00:03:01,360  
global average has increased by one of

11  
00:03:05,270 --> 00:03:03,440  
the driest places on earth southern

12  
00:03:06,949 --> 00:03:05,280  
california these droughts really

13  
00:03:08,390 --> 00:03:06,959

represent events that nobody in the

14

00:03:10,390 --> 00:03:08,400

history of the united states has ever

15

00:03:12,949 --> 00:03:10,400

had to deal with tiny moon that orbits

16

00:03:14,550 --> 00:03:12,959

around saturn has jets and plumes of

17

00:03:17,509 --> 00:03:14,560

water coming out of it saturn's

18

00:03:20,390 --> 00:03:17,519

intriguing moon enceladus actually spews

19

00:03:22,470 --> 00:03:20,400

water ice out of geyser-like vents the

20

00:03:24,869 --> 00:03:22,480

spacecraft will be flying through the

21

00:03:27,270 --> 00:03:24,879

plumes at the south pole the team calls

22

00:03:29,750 --> 00:03:27,280

them tiger stripes the question still

23

00:04:07,270 --> 00:03:29,760

remains will we find hope in our search

24

00:04:07,280 --> 00:06:24,870

three

25

00:06:27,990 --> 00:06:26,550

all right rick thanks for all that data
