

1
00:00:22,390 --> 00:00:18,790
of the examination commission

2
00:00:24,230 --> 00:00:22,400
the crew of expedition 47 48

3
00:00:25,670 --> 00:00:24,240
is ready

4
00:00:35,990 --> 00:00:25,680
for the soyuz

5
00:00:49,029 --> 00:00:38,470
and the date today

6
00:00:49,039 --> 00:00:59,990
and the documentation is here

7
00:01:00,000 --> 00:01:07,670
and do you have any questions

8
00:01:12,630 --> 00:01:09,030
dear guests

9
00:01:22,550 --> 00:01:12,640
do you have any questions to the crew

10
00:01:25,510 --> 00:01:24,070
it hasn't affected the work you know

11
00:01:28,469 --> 00:01:25,520
i've been working on the space station

12
00:01:31,030 --> 00:01:28,479
for almost 20 years in the partnership

13
00:01:33,109 --> 00:01:31,040

we've been training for over two years

14

00:01:33,830 --> 00:01:33,119

the partnership has never been better

15

00:01:34,789 --> 00:01:33,840

and

16

00:01:58,389 --> 00:01:34,799

i

17

00:01:59,990 --> 00:01:58,399

they're all

18

00:02:01,590 --> 00:02:00,000

very and

19

00:02:03,429 --> 00:02:01,600

vary in their difficulty and their

20

00:02:05,429 --> 00:02:03,439

complexity or whatnot

21

00:02:07,270 --> 00:02:05,439

we have a vast array of experiments very

22

00:02:10,070 --> 00:02:07,280

interesting experiments several of them

23

00:02:11,589 --> 00:02:10,080

are our joint experiments

24

00:02:22,070 --> 00:02:11,599

among the partners

25

00:02:27,589 --> 00:02:25,030

about the exam yesterday

26

00:02:30,390 --> 00:02:27,599

the exam went very well

27

00:02:32,949 --> 00:02:30,400

we got through of nominal situations

28

00:02:36,309 --> 00:02:32,959

that we were presented with

29

00:02:37,670 --> 00:02:36,319

and we were quite successful

30

00:02:39,910 --> 00:02:37,680

we had

31

00:02:43,110 --> 00:02:39,920

the following of nominal situations the

32

00:02:45,910 --> 00:02:43,120

electron system failure

33

00:02:49,190 --> 00:02:45,920

com failure the vhf calm

34

00:02:53,110 --> 00:02:49,200

and also breathe failure smart switch

35

00:02:55,910 --> 00:02:53,120

router and a soul failure and by the end

36

00:02:57,589 --> 00:02:55,920

of this team we had

37

00:02:59,670 --> 00:02:57,599

a fire

38

00:03:01,830 --> 00:02:59,680

that we could not

39

00:03:03,430 --> 00:03:01,840

douse on the station

40

00:03:05,670 --> 00:03:03,440

to the space station this one's going to

41

00:03:08,550 --> 00:03:05,680

be a little about five and a half hours

42

00:03:11,270 --> 00:03:08,560

four orbits to rendezvous it's a logical

43

00:03:13,110 --> 00:03:11,280

um advancement in progression and in the

44

00:03:15,030 --> 00:03:13,120

efficiency of the flight so i'm looking

45

00:03:17,190 --> 00:03:15,040

forward to it it's design is a little

46

00:03:19,270 --> 00:03:17,200

bit different because the end result is

47

00:03:20,630 --> 00:03:19,280

the same as before what i'm going to

48

00:03:22,070 --> 00:03:20,640

miss about two-day flight yeah there

49

00:03:23,990 --> 00:03:22,080

were some there's some special things on

50

00:03:25,509 --> 00:03:24,000

a two-day flight

51

00:03:29,670 --> 00:03:25,519

that you get to

52

00:03:32,550 --> 00:03:29,680

to experience living in the small

53

00:03:36,630 --> 00:03:32,560

confines of a soyuz capsule doing the

54

00:03:37,430 --> 00:03:36,640

solar spin is a very unique experience

55

00:03:39,910 --> 00:03:37,440

and

56

00:03:49,270 --> 00:03:39,920

of course we always have the chance to

57

00:03:49,280 --> 00:04:02,309

uh

58

00:04:25,510 --> 00:04:04,229

dear colleagues

59

00:04:25,520 --> 00:04:30,230

thank you
