

a moment with  
**JEFF  
WILLIAMS**

1  
00:00:17,200 --> 00:00:13,449  
of course gone to space is a is an

2  
00:00:19,120 --> 00:00:17,210  
extremely unique experience and we enjoy

3  
00:00:22,480 --> 00:00:19,130  
a lot of support and enthusiasm on the

4  
00:00:24,550 --> 00:00:22,490  
ground among people all across the globe

5  
00:00:27,099 --> 00:00:24,560  
so one of my passions on board has been

6  
00:00:28,900 --> 00:00:27,109  
to take pictures to be able to try to

7  
00:00:31,630 --> 00:00:28,910  
bring the story back and share it with

8  
00:00:34,209 --> 00:00:31,640  
the people on earth I had a whole

9  
00:00:37,479 --> 00:00:34,219  
spectrum of targets if you will from

10  
00:00:38,709 --> 00:00:37,489  
Earth Observation in photography of

11  
00:00:41,350 --> 00:00:38,719  
course you want to get the grandeur of

12  
00:00:43,930 --> 00:00:41,360  
the globe so that's the wide angles day

13  
00:00:46,090 --> 00:00:43,940

and night and of course anyone is zoom

14

00:00:47,260 --> 00:00:46,100

in and you want to get different

15

00:00:49,830 --> 00:00:47,270

features on the ground

16

00:00:54,069 --> 00:00:49,840

for example glaciers around the world

17

00:00:56,229 --> 00:00:54,079

mountains landmarks cities cloud

18

00:00:59,830 --> 00:00:56,239

formations weather patterns trying to

19

00:01:02,410 --> 00:00:59,840

capture that the Sun glint off the ocean

20

00:01:04,479 --> 00:01:02,420

really displays unique aspects that you

21

00:01:06,730 --> 00:01:04,489

can't see otherwise like the the

22

00:01:10,359 --> 00:01:06,740

collision of ocean currents or the wakes

23

00:01:12,219 --> 00:01:10,369

of ships in eruption of a volcano and I

24

00:01:15,130 --> 00:01:12,229

got the entire plume so the eruption had

25

00:01:17,319 --> 00:01:15,140

just started perhaps 20 30 minutes prior

26

00:01:19,510 --> 00:01:17,329

to passing over and when we passed

27

00:01:22,870 --> 00:01:19,520

around again 90 minutes later one orbit

28

00:01:25,690 --> 00:01:22,880

later the eruption was done it was over

29

00:01:27,160 --> 00:01:25,700

so I had contacted the ground found out

30

00:01:29,219 --> 00:01:27,170

that nobody on the ground was aware of

31

00:01:32,109 --> 00:01:29,229

it because it was a really remote

32

00:01:33,940 --> 00:01:32,119

location so even those that observe

33

00:01:35,800 --> 00:01:33,950

volcanoes around the world weren't aware

34

00:01:37,240 --> 00:01:35,810

of it and they became aware of it from

35

00:01:40,179 --> 00:01:37,250

the report from the International Space

36

00:01:42,190 --> 00:01:40,189

Station humans are curious they want to

37

00:01:44,020 --> 00:01:42,200

discover they want to explore even if

38

00:01:47,050 --> 00:01:44,030

it's through the experiences of others

39

00:01:48,710 --> 00:01:47,060

are through through means of writings of

40

00:01:52,790 --> 00:01:48,720

photography of video
