

...and the rest is not bound by anything.

1
00:00:25,010 --> 00:00:23,880
understand that astronaut astronauts in

2
00:00:30,240 --> 00:00:25,020
space flight

3
00:00:33,990 --> 00:00:32,100
and of course in my opinion one of the most

4
00:00:37,020 --> 00:00:34,000
interesting activities on board

5
00:00:39,270 --> 00:00:37,030
is of course exits when two people

6
00:00:46,140 --> 00:00:39,280
work outside the station around no only

7
00:00:46,150 --> 00:00:50,190
is not a

8
00:00:58,400 --> 00:00:52,200
task difficult responsible at the same time

9
00:01:04,410 --> 00:01:01,680
in space, when you look around,

10
00:01:06,720 --> 00:01:04,420
you understand that there is infinite space and there are

11
00:01:09,390 --> 00:01:06,730
no restrictions, the distance where you

12
00:01:11,170 --> 00:01:09,400
work and the earth 400 kilometers of

13
00:01:13,060 --> 00:01:11,180

the substation,

14

00:01:19,060 --> 00:01:13,070

everything else is simply not limited, a

15

00:01:21,940 --> 00:01:20,410

definitely work for six hours,

16

00:01:24,190 --> 00:01:21,950

impossibility and some periods of

17

00:01:26,110 --> 00:01:24,200

rest, and at this time when the Adams station is being conducted,

18

00:01:29,920 --> 00:01:26,120

you look to the ground and it

19

00:01:30,640 --> 00:01:29,930

floats under you is the islands of Diana

20

00:01:38,590 --> 00:01:30,650

video
