00:00:41,670 --> 00:00:39,520

landing day is always a long one for

15

00:00:44,549 --> 00:00:41,680

station crews and it all starts with

16

00:00:46,470 --> 00:00:44,559

saying farewell the departing trio said

17

00:00:48,950 --> 00:00:46,480

their goodbyes before loading into their

00:00:52,869 --> 00:00:50,960

hatches and getting suited up they

22

00:00:59,590 --> 00:00:58,160

using the spacecraft's engines to break

they descended through the earth's

00:01:06,149 --> 00:01:04,080

186 days

29

00:01:15,270 --> 00:01:12,560

six months in space certainly seems like

30

00:01:16,230 --> 00:01:15,280

a lot but what about over 800 days in

31

00:01:17,910 --> 00:01:16,240

space

32

00:01:21,190 --> 00:01:17,920

britain's tim peake was the rookie

33

00:01:24,070 --> 00:01:21,200

amongst the crew and now has 186 days in

34

00:01:26,469 --> 00:01:24,080

space on his resume nasa astronaut tim

and now has 244 days orbiting the earth

37

00:01:34,469 --> 00:01:32,079

for russian cosmonaut yuri malenchenko

38

00:01:38,069 --> 00:01:34,479

this marked the sixth time he's returned

00:01:40,390 --> 00:01:38,079

from space racking up an incredible 828

40

00:01:42,630 --> 00:01:40,400

days in space in his career enough for

41

00:01:45,190 --> 00:01:42,640

second place all-time among space

42

00:01:46,630 --> 00:01:45,200
