

CAPCOM

NASA

OPS PLANNER

1
00:00:03,909 --> 00:00:01,829
of today williams has already been in

2
00:00:06,070 --> 00:00:03,919
space long enough to break the previous

3
00:00:07,829 --> 00:00:06,080
record for most times spent in space by

4
00:00:10,549 --> 00:00:07,839
us astronaut

5
00:00:12,950 --> 00:00:10,559
that previous record was 520 days set by

6
00:00:14,870 --> 00:00:12,960
scott kelly during his year-long mission

7
00:00:16,710 --> 00:00:14,880
and kelly actually dropped into mission

8
00:00:22,710 --> 00:00:16,720
control houston today to congratulate

9
00:00:28,790 --> 00:00:26,710
hey hey jeff it's scott kelly

10
00:00:33,030 --> 00:00:28,800
hello scott how you doing i recognized

11
00:00:36,310 --> 00:00:33,040
your voice before you said scott kelly

12
00:00:38,069 --> 00:00:36,320
hey i wanted to congratulate you on

13
00:00:40,389 --> 00:00:38,079

passing me up here and

14

00:00:41,510 --> 00:00:40,399

total number of days in space it's great

15

00:00:44,470 --> 00:00:41,520

to see

16

00:00:47,029 --> 00:00:44,480

another record broken and especially by

17

00:00:49,270 --> 00:00:47,039

a sardine but i do have one question for

18

00:00:58,229 --> 00:00:49,280

you

19

00:01:06,469 --> 00:01:00,869

190 days i mean that question is not for

20

00:01:10,710 --> 00:01:08,630

well okay great job on the evas i was

21

00:01:12,550 --> 00:01:10,720

watching you from my uh my house great

22

00:01:13,910 --> 00:01:12,560

job to kate and

23

00:01:15,429 --> 00:01:13,920

talk for getting you guys in and out

24

00:01:17,510 --> 00:01:15,439

that was uh that was great that was

25

00:01:18,550 --> 00:01:17,520

supposed to be the eva or the first one

26

00:01:19,990 --> 00:01:18,560

that uh

27

00:01:22,870 --> 00:01:20,000

jill and i was going to do i don't know

28

00:01:23,910 --> 00:01:22,880

if you recall that but hey great job and

29

00:01:26,710 --> 00:01:23,920

great to talk to you guys today

30

00:01:29,670 --> 00:01:26,720

congratulations again

31

00:01:32,310 --> 00:01:29,680

i do remember that uh and uh we never

32

00:01:34,469 --> 00:01:32,320

expected to do it kate and talk did an

33

00:01:36,230 --> 00:01:34,479

awesome job uh it was a it was a good

34

00:01:37,350 --> 00:01:36,240

day of course the hardware treated us

35

00:01:39,190 --> 00:01:37,360

right and

36

00:01:40,630 --> 00:01:39,200

the team on the ground set us up for

37

00:01:43,670 --> 00:01:40,640

success so

38

00:01:45,830 --> 00:01:43,680

we uh we came off that day very happy

39

00:01:47,910 --> 00:01:45,840

great to talk to you

40

00:01:50,230 --> 00:01:47,920

and i think i told you congratulations

41

00:01:52,149 --> 00:01:50,240

before on your success although we

42

00:01:53,270 --> 00:01:52,159

didn't have much many opportunities to

43

00:01:54,870 --> 00:01:53,280

talk

44

00:01:57,590 --> 00:01:54,880

but successfully doing that one year

45

00:02:00,389 --> 00:01:57,600

flight thank you again for

46

00:02:01,109 --> 00:02:00,399

doing it so i didn't have to

47

00:02:05,429 --> 00:02:01,119

i

48

00:02:07,030 --> 00:02:05,439

to come

49

00:02:09,190 --> 00:02:07,040

i said you know if i did the one year

50

00:02:12,550 --> 00:02:09,200

i'd be home six months earlier and that

51
00:02:14,470 --> 00:02:12,560
never flew with anybody they preferred

52
00:02:17,830 --> 00:02:14,480
delay in six months as opposed to going

53
00:02:20,630 --> 00:02:17,840
one year earlier but uh well done on you

54
00:02:21,750 --> 00:02:20,640
and i hope your transition to uh

55
00:02:25,350 --> 00:02:21,760
to your

56
00:02:27,350 --> 00:02:25,360
host nasa is going well

57
00:02:28,869 --> 00:02:27,360
yeah yeah so far so good and yeah i

58
00:02:30,949 --> 00:02:28,879
haven't you know obviously i haven't

59
00:02:32,550 --> 00:02:30,959
seen you since i launched there and

60
00:02:33,750 --> 00:02:32,560
in baikonur so look forward to seeing

61
00:02:35,270 --> 00:02:33,760
you when you get back hopefully i'll be

62
00:02:36,630 --> 00:02:35,280
out there and uh

63
00:02:38,070 --> 00:02:36,640

early

64

00:02:41,509 --> 00:02:38,080

next month in the middle of the night

65

00:02:43,030 --> 00:02:41,519

when uh when you guys get home

66

00:02:44,790 --> 00:02:43,040

that's good scott look forward to seeing

67

00:02:46,470 --> 00:02:44,800

you i still remember you being here when

68

00:02:48,150 --> 00:02:46,480

i returned from expedition 13 i

69

00:02:49,910 --> 00:02:48,160

appreciated that

70

00:02:52,309 --> 00:02:49,920

all right take it easy sorry to bother

71

00:02:54,550 --> 00:02:52,319

your lunch

72

00:02:56,390 --> 00:02:54,560

thanks for bothering us we enjoyed uh

73

00:02:57,910 --> 00:02:56,400

talking to you take care
