

The image features a dark, textured sphere with a sharp, pointed edge on the right side, set against a vibrant blue background filled with white and light blue streaks, resembling a starry sky or nebula. The word "Marsa" is written across the sphere in a large, bold, metallic font with a greenish-gold hue and a dark outline.

Marsa

ON THE EDGE OF FOREVER
INTERNATIONAL COOPERATION

1
00:00:08,380 --> 00:00:04,300
multiracial multi-ethnic and

2
00:00:12,410 --> 00:00:11,060
the creators will start track knew that

3
00:00:14,150 --> 00:00:12,420
if humans are too someday explore the

4
00:00:16,070 --> 00:00:14,160
universe who we need to put aside our

5
00:00:18,230 --> 00:00:16,080
differences because to boldly go on

6
00:00:31,640 --> 00:00:18,240
behalf of all humankind would truly

7
00:00:37,530 --> 00:00:34,380
Star Trek showed us what an inclusive

8
00:00:38,750 --> 00:00:37,540
diverse future could look like just look

9
00:00:41,220 --> 00:00:38,760
at the bridge of the enterprise

10
00:00:44,820 --> 00:00:41,230
different races and species working

11
00:00:47,850 --> 00:00:44,830
together in peace for a common cause we

12
00:00:50,130 --> 00:00:47,860
had lieutenant Uhura we had Sulu we had

13
00:00:53,030 --> 00:00:50,140

a check off we have Vulcan we had

14

00:00:55,619 --> 00:00:53,040

everyone cooperating for one goal

15

00:00:58,770 --> 00:00:55,629

Starship Enterprise was a metaphor of a

16

00:01:02,970 --> 00:00:58,780

starship earth and a strength of the

17

00:01:05,070 --> 00:01:02,980

starship lay in its diversity coming

18

00:01:08,100 --> 00:01:05,080

together and working as a team

19

00:01:09,870 --> 00:01:08,110

Star Trek was a refuge it was a place

20

00:01:11,760 --> 00:01:09,880

where you want to believe in that we

21

00:01:14,670 --> 00:01:11,770

want to believe would would someday

22

00:01:16,440 --> 00:01:14,680

happen that was how we could be and now

23

00:01:18,840 --> 00:01:16,450

we're actually living that on the

24

00:01:20,490 --> 00:01:18,850

international space station the

25

00:01:23,249 --> 00:01:20,500

international space station is this

26

00:01:25,650 --> 00:01:23,259

incredible laboratory in space it is a

27

00:01:28,170 --> 00:01:25,660

place that allows scientists from all

28

00:01:30,540 --> 00:01:28,180

over the world to do scientific research

29

00:01:32,100 --> 00:01:30,550

that can lead to these amazing and

30

00:01:34,109 --> 00:01:32,110

surprising discoveries that couldn't

31

00:01:36,590 --> 00:01:34,119

have been made anywhere else more than

32

00:01:39,060 --> 00:01:36,600

anything else is an exercise in

33

00:01:43,140 --> 00:01:39,070

international cooperation there are

34

00:01:46,080 --> 00:01:43,150

Russians Japanese Americans Europeans

35

00:01:47,700 --> 00:01:46,090

and Canadian astronauts and over 96

36

00:01:49,649 --> 00:01:47,710

countries have participated in some

37

00:01:51,539 --> 00:01:49,659

aspect of the space station our cultures

38

00:01:53,730 --> 00:01:51,549

are so different at the same time we are

39

00:01:56,490 --> 00:01:53,740

so similar because our desire of our

40

00:01:58,590 --> 00:01:56,500

pulses is all the same so it's kind of a

41

00:02:01,050 --> 00:01:58,600

weird place where politics doesn't

42

00:02:04,340 --> 00:02:01,060

visibly play a role there's a peaceful

43

00:02:07,230 --> 00:02:04,350

use of space the big benefit of

44

00:02:09,210 --> 00:02:07,240

collaborating together is of course that

45

00:02:11,520 --> 00:02:09,220

we're advancing our science together as

46

00:02:13,590 --> 00:02:11,530

a whole and that people around the world

47

00:02:13,890 --> 00:02:13,600

not just in one country get the benefits

48

00:02:17,280 --> 00:02:13,900

of

49

00:02:21,690 --> 00:02:17,290

research results seeing our differences

50

00:02:23,789 --> 00:02:21,700

as an asset that's our strength together

51
00:02:24,720 --> 00:02:23,799
we can accomplish things we never

52
00:02:27,000 --> 00:02:24,730
thought we could

53
00:02:28,979 --> 00:02:27,010
Star Trek at the time it was about

54
00:02:30,599 --> 00:02:28,989
possibilities and the things that we

55
00:02:33,240 --> 00:02:30,609
could become and we could do in the

56
00:02:35,910 --> 00:02:33,250
future and that was a very inspiring

57
00:02:38,460 --> 00:02:35,920
message you know that all races and

58
00:02:40,140 --> 00:02:38,470
religions and National Origins we could

59
00:02:43,229 --> 00:02:40,150
we could all work together the show

60
00:02:46,140 --> 00:02:43,239
really served as an inspiration not just

61
00:02:48,869 --> 00:02:46,150
for one nation but for the next

62
00:02:52,170 --> 00:02:48,879
generation of scientists engineers and

63
00:02:53,879 --> 00:02:52,180

explorers people always ask me yeah you

64

00:02:55,770 --> 00:02:53,889

know as a black female did you ever

65

00:02:57,149 --> 00:02:55,780

think you could be a part of this and it

66

00:03:00,210 --> 00:02:57,159

never dawned on me that I couldn't

67

00:03:02,250 --> 00:03:00,220

because I saw these models of no like

68

00:03:03,929 --> 00:03:02,260

Star Trek we were talking about a future

69

00:03:06,720 --> 00:03:03,939

where people could get along I think

70

00:03:10,229 --> 00:03:06,730

that was that was ultimately our our

71

00:03:12,390 --> 00:03:10,239

greatest gift to the culture leave any

72

00:03:14,879 --> 00:03:12,400

bigotry in your quarters there's no room

73

00:03:20,510 --> 00:03:14,889

for it on the bridge do I make myself

74

00:03:25,160 --> 00:03:23,000

well if we want to go further beyond

75

00:03:28,160 --> 00:03:25,170

what we have achieved now we are going

76
00:03:30,050 --> 00:03:28,170
to need a global effort we can use that

77
00:03:32,270 --> 00:03:30,060
partnership to leverage the way that

78
00:03:35,000 --> 00:03:32,280
humankind will explore beyond Earth

79
00:03:37,760 --> 00:03:35,010
orbit to the moon to Mars beyond Mars

80
00:03:39,680 --> 00:03:37,770
out into the world of what we think now

81
00:03:40,370 --> 00:03:39,690
is science fiction and who knows from

82
00:03:43,040 --> 00:03:40,380
there only

83
00:03:45,140 --> 00:03:43,050
imagination is going to be the limit the

84
00:03:47,980 --> 00:03:45,150
human animal is an adventurous animal

85
00:03:51,790 --> 00:03:47,990
and the cheer there are risks involved

86
00:03:54,800 --> 00:03:51,800
but we boldly take those risks and

87
00:03:57,860 --> 00:03:54,810
hunger for that information that

88
00:04:02,060 --> 00:03:57,870

knowledge that lies out there that's the

89

00:04:04,470 --> 00:04:02,070

great human adventure we are curious

90

00:04:06,449 --> 00:04:04,480

creatures

91

00:04:08,640 --> 00:04:06,459

who knows how far into the universe will

92

00:04:11,009 --> 00:04:08,650

eventually travel or what strange new

93

00:04:12,930 --> 00:04:11,019

worlds humanity will someday explore but

94

00:04:15,720 --> 00:04:12,940

you can be sure that when we do it'll be
