

1
00:00:00,000 --> 00:00:02,340
Hello I'm David Elliot. I'm the program

2
00:00:02,340 --> 00:00:03,959
manager and one of the flight engineers

3
00:00:03,959 --> 00:00:06,420
on NASA Super Guppy aircraft. This

4
00:00:06,420 --> 00:00:09,000
aircraft has been around since, one of

5
00:00:09,000 --> 00:00:11,250
them at least in since the early 1960s,

6
00:00:11,250 --> 00:00:14,759
and has moved everything from Apollo

7
00:00:14,759 --> 00:00:17,340
crew modules, Saturn rocket boosters,

8
00:00:17,340 --> 00:00:20,789
parts to the ISS, and many different programs.

9
00:00:20,789 --> 00:00:23,550
And we're currently moving parts of

10
00:00:23,550 --> 00:00:26,550
Orion, the next space vehicle that will

11
00:00:26,550 --> 00:00:27,539
be launching into space.

12
00:00:27,539 --> 00:00:29,340
We're based out of Johnson Space Center

13
00:00:29,340 --> 00:00:31,890

at Ellington Field. We have missions to

14

00:00:31,890 --> 00:00:34,140

move different space hardware from the
