NOT Lost in Space

1
00:00:10,870 --> 00:00:09,350
but the funny part is the funny part is

2
00:00:12,230 --> 00:00:10,880
when you when you're not watching or

3
00:00:14,549 --> 00:00:12,240
they'll float off

4
00:00:16,470 --> 00:00:14,559
and then you'll hunt for them and you

5
00:00:17,750 --> 00:00:16,480
have one whale over time finding these

6
00:00:19,109 --> 00:00:17,760
objects you look all around and then

7
00:00:21,109 --> 00:00:19,119
somebody on the other side will say look

8
00:00:22,550 --> 00:00:21,119
it's right by your left ear

9
00:00:24,310 --> 00:00:22,560
you've heard of dirty jobs well this one

10
00:00:25,589 --> 00:00:24,320
takes the cake it's the stowage console

11
00:00:27,830 --> 00:00:25,599
in the payload operations integration

12
00:00:29,349 --> 00:00:27,840
center kerry and allison they have to

13
00:00:31,509 --> 00:00:29,359

keep track of all those things floating

14

00:00:32,709 --> 00:00:31,519

around in space carrie do astronauts

15

00:00:36,790 --> 00:00:32,719

lose things

16

00:00:37,990 --> 00:00:36,800

well how do you keep track of that i

17

00:00:39,510 --> 00:00:38,000

mean i can't even keep track of my

18

00:00:42,069 --> 00:00:39,520

toothbrush so

19

00:00:44,229 --> 00:00:42,079

how do you keep track we have a database

20

00:00:46,470 --> 00:00:44,239

that all of our items are listed in and

21

00:00:48,069 --> 00:00:46,480

and we track every time the items are

22

00:00:50,630 --> 00:00:48,079

used on board

23

00:00:52,470 --> 00:00:50,640

dates times the last person to use it

24

00:00:54,389 --> 00:00:52,480

what kinds of things do we look for the

25

00:00:56,709 --> 00:00:54,399

stowage group here we're responsible for

26
00:00:59,110 --> 00:00:56,719
tracking any equipment and hardware used

27
00:01:01,110 --> 00:00:59,120
for payload experiments

28
00:01:03,670 --> 00:01:01,120
so when they're doing the experiment and

29
00:01:06,149 --> 00:01:03,680
they need a wrench or whatever you guys

30
00:01:08,230 --> 00:01:06,159
have to tell them where it's at exactly

31
00:01:09,990 --> 00:01:08,240
we do well how do you know our database

32
00:01:11,670 --> 00:01:10,000
is absolutely invaluable that is where

33
00:01:13,429 --> 00:01:11,680
we go for everything so we're saying

34
00:01:14,550 --> 00:01:13,439
that's like a barcode system like you

35
00:01:16,390 --> 00:01:14,560
see at the grocery store it has

36
00:01:18,710 --> 00:01:16,400
identifiers for every item every item's

37
00:01:20,550 --> 00:01:18,720
in there and we we move it every time

38
00:01:23,109 --> 00:01:20,560

there is a change it gets moved to that

39

00:01:25,429 --> 00:01:23,119

new location so the next time we look it

40

00:01:27,590 --> 00:01:25,439

it's in the updated location they have a

41

00:01:29,910 --> 00:01:27,600

lot going on up there so we try and help

42

00:01:31,990 --> 00:01:29,920

them out here on the ground and there

43

00:01:33,749 --> 00:01:32,000

are so many items up there and so many

44

00:01:35,510 --> 00:01:33,759

storage locations where the items are

45

00:01:37,350 --> 00:01:35,520

kept it's impossible to keep track of

46

00:01:39,429 --> 00:01:37,360

where everything is at all the time for

47

00:01:40,870 --> 00:01:39,439

one person so now

48

00:01:42,789 --> 00:01:40,880

let's figure out where the weirdest

49

00:01:44,069 --> 00:01:42,799

place we we found something we'll often

50

00:01:45,510 --> 00:01:44,079

look at the camera and there'll just be

51
00:01:47,270 --> 00:01:45,520
an item you know just kind of floating

52
00:01:49,270 --> 00:01:47,280
by look at this look at the bolt the

53
00:01:50,310 --> 00:01:49,280
boat we lost dude it's just floating

54
00:01:51,670 --> 00:01:50,320
here

55
00:01:53,830 --> 00:01:51,680
i just came around the corner from the

56
00:01:55,990 --> 00:01:53,840
cupola and it's floating here who's more

57
00:01:58,149 --> 00:01:56,000
organized the men or the women

58
00:02:00,389 --> 00:01:58,159
the women i would have to say it's the

59
00:02:01,990 --> 00:02:00,399
women it's just like at home

60
00:02:03,350 --> 00:02:02,000
i know that i knew that there are a lot

61
00:02:04,469 --> 00:02:03,360
of things that you throw away after an

62
00:02:05,830 --> 00:02:04,479
experiment too you guys have to keep

63
00:02:07,190 --> 00:02:05,840

track of that too you have to that's

64

00:02:08,949 --> 00:02:07,200

dirty okay

65

00:02:10,710 --> 00:02:08,959

trash is hard it's it's probably one of

66

00:02:12,150 --> 00:02:10,720

the hardest things about the job you'd

67

00:02:14,710 --> 00:02:12,160

be surprised what goes into just

68

00:02:16,070 --> 00:02:14,720

trashing a ziploc bag so so anything

69

00:02:18,390 --> 00:02:16,080

that we trash we have to have a

70

00:02:20,309 --> 00:02:18,400

paperwork in place since we tracked it

71

00:02:22,630 --> 00:02:20,319

going up to the station we have to track

72

00:02:25,910 --> 00:02:22,640

it coming back home or being disposed of
