

1  
00:00:28,450 --> 00:00:24,950  
is it cold is a hot is it really really

2  
00:00:30,439 --> 00:00:28,460  
red did you meet any aliens whoa whoa

3  
00:00:35,180 --> 00:00:30,449  
where was I

4  
00:00:38,030 --> 00:00:35,190  
Mars there was a barren landscape colder

5  
00:00:43,540 --> 00:00:38,040  
than the North Pole but a state of kings

6  
00:00:46,250 --> 00:00:43,550  
of white ice they'll melt is a red thing

7  
00:00:49,040 --> 00:00:46,260  
the same reason you want to go

8  
00:00:51,740 --> 00:00:49,050  
we're explored but how come everyone

9  
00:00:55,069 --> 00:00:51,750  
says that no one beats a Mars don't they

10  
00:00:57,860 --> 00:00:55,079  
know about your mission well see that's

11  
00:01:00,860 --> 00:00:57,870  
the interesting story that was a solo

12  
00:01:03,259 --> 00:01:00,870  
mission NASA wouldn't hire me I may not

13  
00:01:05,420 --> 00:01:03,269

have a degree but I knew I could build a

14

00:01:09,200 --> 00:01:05,430

spaceship so what did you do

15

00:01:10,820 --> 00:01:09,210

I walked around took some scans and even

16

00:01:15,080 --> 00:01:10,830

planted a flower a flower

17

00:01:18,020 --> 00:01:15,090

why just had a HUS to do it there's a

18

00:01:22,399 --> 00:01:18,030

good thing I did too in reentry my

19

00:01:26,300 --> 00:01:22,409

spaceship got really hot too hot I had

20

00:01:29,990 --> 00:01:26,310

to eject all of my findings all the

21

00:01:33,230 --> 00:01:30,000

proof of my trip going in a flame are

22

00:01:37,490 --> 00:01:33,240

you gonna go back up this place me nah

23

00:01:40,399 --> 00:01:37,500

I'm too old when I grow up and I go to

24

00:01:45,499 --> 00:01:40,409

Mars i'ma let everyone know now you were

25

00:01:50,370 --> 00:01:48,090

today is a historic day for the people

26  
00:01:52,529 --> 00:01:50,380  
of Earth the first manned mission to

27  
00:01:55,859 --> 00:01:52,539  
Mars on the Orion spacecraft is

28  
00:01:59,160 --> 00:01:55,869  
launching in a matter of minutes on this

29  
00:02:01,139 --> 00:01:59,170  
flight is astronaut Alice price who says

30  
00:02:17,000 --> 00:02:01,149  
she's dedicating this mission to her

31  
00:02:17,010 --> 00:02:25,140  
shame about that mr. Simmons

32  
00:02:25,150 --> 00:02:37,460  
[Music]

33  
00:02:37,470 --> 00:02:43,190  
[Applause]

34  
00:03:24,520 --> 00:02:57,200  
[Music]

35  
00:03:24,530 --> 00:03:28,630  
you

36  
00:03:38,059 --> 00:03:33,470  
it's a new dawn a new era nothing will

37  
00:03:40,309 --> 00:03:38,069  
ever be the same again finding life on

38  
00:03:44,020 --> 00:03:40,319

Mars maybe the redemption that Earth's
