

**Christina Koch's
Most Memorable
Moments in Space
Part 2**

1
00:00:00,150 --> 00:00:09,350

[Music]

2
00:00:13,749 --> 00:00:11,589

i'd have to say any meal that we share

3
00:00:15,430 --> 00:00:13,759

together is a great one and of those

4
00:00:16,950 --> 00:00:15,440

some of my favorites i would say would

5
00:00:18,950 --> 00:00:16,960

be our pizza nights

6
00:00:20,470 --> 00:00:18,960

our folks on the ground send up care

7
00:00:22,630 --> 00:00:20,480

packages sometimes and they'll put

8
00:00:24,710 --> 00:00:22,640

together a little non-perishable pizza

9
00:00:26,870 --> 00:00:24,720

kit and we're able to actually make

10
00:00:28,830 --> 00:00:26,880

pizzas in our kind of makeshift space

11
00:00:31,189 --> 00:00:28,840

oven using tin foil and a little bit of

12
00:00:32,709 --> 00:00:31,199

creativity and seeing what everybody

13
00:00:33,910 --> 00:00:32,719

comes up with and sharing with each

14

00:00:35,430 --> 00:00:33,920

other and just something a little

15

00:00:36,709 --> 00:00:35,440

different a little bit out of the norm

16

00:00:39,110 --> 00:00:36,719

that we actually feel like we get to

17

00:00:41,430 --> 00:00:39,120

prepare ourselves as opposed to just

18

00:00:47,590 --> 00:00:41,440

opening up out of a packet it's really

19

00:00:51,750 --> 00:00:49,430

one really striking moment was the first

20

00:00:53,110 --> 00:00:51,760

time i saw my hometown in the area where

21

00:00:55,590 --> 00:00:53,120

i grew up which is coastal north

22

00:00:57,430 --> 00:00:55,600

carolina and seeing those outer banks

23

00:00:59,430 --> 00:00:57,440

come into focus around the horizon and

24

00:01:01,750 --> 00:00:59,440

suddenly realizing what i was looking at

25

00:01:03,830 --> 00:01:01,760

was a just breathtaking moment some of

26

00:01:06,390 --> 00:01:03,840

the other favorite things i have to look

27

00:01:08,070 --> 00:01:06,400

at would be definitely the auroras the

28

00:01:09,350 --> 00:01:08,080

northern lights and the southern lights

29

00:01:11,590 --> 00:01:09,360

and those are really special to me

30

00:01:13,590 --> 00:01:11,600

because i spent so many years working in

31

00:01:15,749 --> 00:01:13,600

the antarctic and the arctic and seeing

32

00:01:18,310 --> 00:01:15,759

those auroras from below

33

00:01:30,870 --> 00:01:18,320

and so to see them on a planetary scale
