

CREW-1 ASTRONAUTS

ADVANCE RESEARCH IN SPACE

1
00:00:05,829 --> 00:00:04,070
and resilience rises not even gravity

2
00:00:07,829 --> 00:00:05,839
contains humanity

3
00:00:10,150 --> 00:00:07,839
we are so excited to be here we are

4
00:00:12,709 --> 00:00:10,160
humbled and we are excited to be a part

5
00:00:15,630 --> 00:00:12,719
of this great expedition and can't wait

6
00:00:19,429 --> 00:00:15,640
to get started

7
00:00:23,750 --> 00:00:21,510
we have several different experiments

8
00:00:25,509 --> 00:00:23,760
going on inside of the space station in

9
00:00:27,509 --> 00:00:25,519
racks in different little facilities

10
00:00:29,669 --> 00:00:27,519
like our our life sciences glove box

11
00:00:32,150 --> 00:00:29,679
that we use for for biological and life

12
00:00:35,110 --> 00:00:32,160
sciences but we also have experiments

13
00:00:38,069 --> 00:00:35,120

that are are run on us

14

00:00:40,549 --> 00:00:38,079

space to ground three for shannon we're

15

00:00:44,150 --> 00:00:40,559

watching the flame do its thing you have

16

00:00:48,869 --> 00:00:44,160

three very mesmerized pi's

17

00:00:52,850 --> 00:00:51,029

all right are you ready for this

18

00:00:56,790 --> 00:00:52,860

what do you think of that

19

00:01:03,750 --> 00:01:01,029

that is beautiful thank you guys

20

00:01:05,990 --> 00:01:03,760

the plant will grow in this direction

21

00:01:09,510 --> 00:01:06,000

meaning we'll put some light on top of

22

00:01:11,590 --> 00:01:09,520

it and we will see how it grows for the

23

00:01:13,429 --> 00:01:11,600

next 30 days

24

00:01:14,630 --> 00:01:13,439

again shannon you struck it rich forest

25

00:01:16,390 --> 00:01:14,640

that was great

26

00:01:18,390 --> 00:01:16,400

that that's the primary objective right

27

00:01:21,670 --> 00:01:18,400

there yes we got double thumbs up down

28

00:01:27,510 --> 00:01:24,789

in station spacecraft ii signals capture

29

00:01:31,270 --> 00:01:27,520

is complete welcome to isis this is

30

00:01:42,149 --> 00:01:34,480

that was awesome

31

00:01:47,429 --> 00:01:44,710

we develop technologies and ways of

32

00:01:49,109 --> 00:01:47,439

using those technologies health care and

33

00:01:50,149 --> 00:01:49,119

medical technologies

34

00:01:52,149 --> 00:01:50,159

that are

35

00:01:54,469 --> 00:01:52,159

ways to improve life on earth but even

36

00:01:56,630 --> 00:01:54,479

more important than that i believe space

37

00:01:58,789 --> 00:01:56,640

has some a way of universally inspiring

38

00:02:00,230 --> 00:01:58,799

people making folks want to do very

39

00:02:02,789 --> 00:02:00,240

challenging things to the best of their

40

00:02:05,350 --> 00:02:02,799

ability is what i think the human space

41

00:02:07,590 --> 00:02:05,360

exploration does most for humankind and

42

00:02:09,350 --> 00:02:07,600

so the human aspect of human space

43

00:02:16,900 --> 00:02:09,360

exploration is always going to be very

44

00:02:24,910 --> 00:02:22,229

[Music]
