

What did you bring on this mission?

1  
00:00:00,190 --> 00:00:14,070

[Music]

2  
00:00:17,189 --> 00:00:15,749

what did i bring on this mission i

3  
00:00:18,550 --> 00:00:17,199

bought my brought my wedding ring it's

4  
00:00:20,310 --> 00:00:18,560

not on my finger but it's always been on

5  
00:00:22,630 --> 00:00:20,320

my watch band

6  
00:00:24,550 --> 00:00:22,640

and was i up tied down a lot every time

7  
00:00:26,230 --> 00:00:24,560

i needed to be upside down

8  
00:00:28,830 --> 00:00:26,240

i did it and i got really comfortable

9  
00:00:31,429 --> 00:00:28,840

flipping directions no hands

10  
00:00:34,069 --> 00:00:31,439

so that's one of the joys about space

11  
00:00:36,709 --> 00:00:34,079

flight now that you've set a record of

12  
00:00:39,190 --> 00:00:36,719

consecutive number of days in space have

13  
00:00:39,990 --> 00:00:39,200

you decided to make any changes in your

14

00:00:42,549 --> 00:00:40,000

life

15

00:00:46,549 --> 00:00:42,559

to get outside as much as possible i've

16

00:00:48,229 --> 00:00:46,559

had an indoor job 24 7 for almost a year

17

00:00:50,069 --> 00:00:48,239

so i'm looking forward to being outside

18

00:00:52,630 --> 00:00:50,079

no matter what kind of weather

19

00:00:53,590 --> 00:00:52,640

has spending time in space changed my

20

00:00:55,670 --> 00:00:53,600

view

21

00:00:57,830 --> 00:00:55,680

of our home planet

22

00:00:59,029 --> 00:00:57,840

the big change in how i view the planet

23

00:01:00,869 --> 00:00:59,039

is really

24

00:01:03,990 --> 00:01:00,879

this concept that we all have as

25

00:01:06,310 --> 00:01:04,000

earthlings of being separate from space

26  
00:01:08,789 --> 00:01:06,320  
having been up here looking down on the

27  
00:01:11,429 --> 00:01:08,799  
earth from outside the atmosphere

28  
00:01:12,870 --> 00:01:11,439  
to me that atmosphere right now looks so

29  
00:01:13,670 --> 00:01:12,880  
thin

30  
00:01:15,030 --> 00:01:13,680  
that

31  
00:01:17,190 --> 00:01:15,040  
back on earth

32  
00:01:19,109 --> 00:01:17,200  
it seems much clearer to me that when

33  
00:01:20,310 --> 00:01:19,119  
you're standing outside looking up at

34  
00:01:22,710 --> 00:01:20,320  
the stars

35  
00:01:24,870 --> 00:01:22,720  
you're really in space

36  
00:01:27,270 --> 00:01:24,880  
the only thing separating you from the

37  
00:01:29,510 --> 00:01:27,280  
vacuum of space is that precious thin

38  
00:01:31,429 --> 00:01:29,520

layer of atmosphere that we call home

39

00:01:33,990 --> 00:01:31,439

how important was your mission to the

40

00:01:36,230 --> 00:01:34,000

space station to our planet and to

41

00:01:38,870 --> 00:01:36,240

yourself as a human being

42

00:01:40,710 --> 00:01:38,880

every day there's 60 to 100 experiments

43

00:01:42,389 --> 00:01:40,720

going on at any given time now we don't

44

00:01:44,389 --> 00:01:42,399

operate those experiments all the time

45

00:01:45,429 --> 00:01:44,399

but they are on the space station in

46

00:01:48,469 --> 00:01:45,439

progress

47

00:01:50,550 --> 00:01:48,479

and i really believe that all the days

48

00:01:53,270 --> 00:01:50,560

we spent on the space station the money

49

00:01:56,310 --> 00:01:53,280

we've invested the talent we've invested

50

00:01:58,389 --> 00:01:56,320

will there continue to

51  
00:02:00,789 --> 00:01:58,399  
result in fantastic scientific

52  
00:02:01,830 --> 00:02:00,799  
discoveries and will just help humans

53  
00:02:03,670 --> 00:02:01,840  
progress

54  
00:02:05,910 --> 00:02:03,680  
what scientific experiment did i like

55  
00:02:08,790 --> 00:02:05,920  
working on the most and why

56  
00:02:10,630 --> 00:02:08,800  
a unique experience we had with growing

57  
00:02:12,390 --> 00:02:10,640  
hatch chili peppers

58  
00:02:14,630 --> 00:02:12,400  
and the reason i like it so much is

59  
00:02:18,229 --> 00:02:14,640  
because when i opened up

60  
00:02:21,350 --> 00:02:18,239  
that cover and could smell those peppers

61  
00:02:23,830 --> 00:02:21,360  
it was such a shocking difference this

62  
00:02:26,710 --> 00:02:23,840  
smell of plants and vegetation

63  
00:02:29,670 --> 00:02:26,720

it was amazing and then we got to eat

64

00:02:31,910 --> 00:02:29,680

the peppers so that was a huge bonus

65

00:02:33,350 --> 00:02:31,920

what was my most memorable experiment

66

00:02:35,990 --> 00:02:33,360

experience

67

00:02:38,070 --> 00:02:36,000

on the international space station

68

00:02:40,550 --> 00:02:38,080

i would say on this trip it has been

69

00:02:43,430 --> 00:02:40,560

some of the auroras we've seen either

70

00:02:45,830 --> 00:02:43,440

the aurora australis down south or the

71

00:02:48,869 --> 00:02:45,840

aurora borealis up north

72

00:02:50,790 --> 00:02:48,879

i just had this incredible sense of

73

00:02:53,270 --> 00:02:50,800

witnessing something

74

00:02:54,550 --> 00:02:53,280

that was timeless i'm really looking

75

00:02:56,150 --> 00:02:54,560

forward to seeing you all again and

76

00:03:04,470 --> 00:02:56,160

can't we get great to get back home to
