

New Eyes

ASTRONAUT
victor glover

1
00:00:11,450 --> 00:00:08,410

[Music]

2
00:00:15,350 --> 00:00:13,370

what is one thing that was changed by

3
00:00:17,689 --> 00:00:15,360

your experience in space

4
00:00:18,849 --> 00:00:17,699

one thing that was changed by my

5
00:00:22,189 --> 00:00:18,859

experience

6
00:00:23,510 --> 00:00:22,199

looking back at like this total

7
00:00:27,589 --> 00:00:23,520

experience

8
00:00:30,470 --> 00:00:27,599

one thing that's important to me is

9
00:00:32,569 --> 00:00:30,480

that the way I look at the Earth and

10
00:00:34,069 --> 00:00:32,579

sunrise and sunset you know those are

11
00:00:36,590 --> 00:00:34,079

still important

12
00:00:39,229 --> 00:00:36,600

and they I think I I see them in a new

13
00:00:41,869 --> 00:00:39,239

way because of because of my time living

14

00:00:44,090 --> 00:00:41,879

in low earth orbit but I want to

15

00:00:45,590 --> 00:00:44,100

communicate to people that you don't

16

00:00:47,630 --> 00:00:45,600

have to go to space those things should

17

00:00:50,869 --> 00:00:47,640

be important this Earth it's beautiful

18

00:00:53,270 --> 00:00:50,879

and it's powerful and robust in a lot of

19

00:00:56,209 --> 00:00:53,280

ways but it's fragile in other ways that

20

00:00:58,729 --> 00:00:56,219

we as humans can affect and humans human

21

00:01:01,549 --> 00:00:58,739

life is special training with my crew

22

00:01:03,889 --> 00:01:01,559

for three years it makes me sensitive to

23

00:01:05,870 --> 00:01:03,899

thinking about other people in ways that

24

00:01:08,090 --> 00:01:05,880

may not be a part of normal life but

25

00:01:10,250 --> 00:01:08,100

going to space didn't make that more

26

00:01:11,630 --> 00:01:10,260

important it just reminded us that it

27

00:01:14,590 --> 00:01:11,640

was already important and so I would

28

00:01:17,210 --> 00:01:14,600

hope people can can look at the planet

29

00:01:18,770 --> 00:01:17,220

and just you know you don't have to see

30

00:01:20,749 --> 00:01:18,780

it from space to know it's important and

31

00:01:23,810 --> 00:01:20,759

that we need to protect it and I think

32

00:01:25,730 --> 00:01:23,820

people can look at other people and know

33

00:01:28,370 --> 00:01:25,740

human life is important it needs to be

34

00:01:29,990 --> 00:01:28,380

protected without having to train for a

35

00:01:32,630 --> 00:01:30,000

space mission with you know these people

36

00:01:34,429 --> 00:01:32,640

that become like family you know for

37

00:01:36,170 --> 00:01:34,439

training together for years it's

38

00:01:38,149 --> 00:01:36,180

interesting I guess I'm kind of saying

39

00:01:40,850 --> 00:01:38,159

some things change but in a lot of ways

40

00:01:42,890 --> 00:01:40,860

I'm still the same person I like your

41

00:01:44,270 --> 00:01:42,900

response about the sun because under the

42

00:01:46,030 --> 00:01:44,280

impression of how many times you saw it

43

00:01:49,670 --> 00:01:46,040

I thought you were gonna get like tired

44

00:01:52,010 --> 00:01:49,680

no and in fact even now I watched the

45

00:01:53,990 --> 00:01:52,020

sunrise and sunset in a different way I

46

00:02:00,320 --> 00:01:54,000

still think it's one of the most amazing

47

00:02:05,510 --> 00:02:01,749

[Music]

48

00:02:08,550 --> 00:02:05,520

the video just doesn't do it justice

49

00:02:09,729 --> 00:02:08,560

is pretty amazing though

50

00:02:12,470 --> 00:02:09,739

[Music]

51
00:02:15,770 --> 00:02:12,480
seeing the world as it is the fragile

52
00:02:19,250 --> 00:02:15,780
thin atmosphere that keeps us alive that

53
00:02:21,470 --> 00:02:19,260
makes Earth habitable seeing the water

54
00:02:23,930 --> 00:02:21,480
not just the oceans but the clouds

55
00:02:25,430 --> 00:02:23,940
moving around the planet seeing dust

56
00:02:27,710 --> 00:02:25,440
storms you know indicative of the way

57
00:02:31,130 --> 00:02:27,720
that the air flows around the planet I

58
00:02:33,350 --> 00:02:31,140
mean being able to see like a huge swath

59
00:02:36,110 --> 00:02:33,360
of the the coast of the African

60
00:02:37,970 --> 00:02:36,120
continent multiple countries or an

61
00:02:39,890 --> 00:02:37,980
entire body of water like the the

62
00:02:41,089 --> 00:02:39,900
Atlantic Ocean from the east coast of

63
00:02:42,949 --> 00:02:41,099

the United States to the west coast of

64

00:02:44,630 --> 00:02:42,959

Africa you know and to like see the

65

00:02:47,030 --> 00:02:44,640

whole Bay of Biscay right outside of

66

00:02:48,949 --> 00:02:47,040

France like those things are so powerful

67

00:02:51,050 --> 00:02:48,959

because you've only seen them on maps on

68

00:02:52,550 --> 00:02:51,060

paper and so to see it with your own

69

00:02:54,589 --> 00:02:52,560

eyes

70

00:02:57,949 --> 00:02:54,599

I think contributes to this overview

71

00:02:59,270 --> 00:02:57,959

effect it makes you appreciate this

72

00:03:01,250 --> 00:02:59,280

beautiful rock that we get to travel

73

00:03:04,430 --> 00:03:01,260

through space my address was low earth

74

00:03:06,350 --> 00:03:04,440

orbit for almost six months and I think

75

00:03:08,770 --> 00:03:06,360

that being able to share that feeling

76
00:03:13,250 --> 00:03:08,780
that emotion and again most important

77
00:03:15,710 --> 00:03:13,260
that turning into action is is one of my

78
00:03:18,770 --> 00:03:15,720
primary missions

79
00:03:21,770 --> 00:03:18,780
that's for me probably the biggest

80
00:03:23,990 --> 00:03:21,780
change is that I need to figure out how

81
00:03:26,630 --> 00:03:24,000
to connect all people to the overview

82
00:03:28,570 --> 00:03:26,640
effect you know seeing the Earth in its

83
00:03:32,330 --> 00:03:28,580
pure form Without Borders without words

84
00:03:34,490 --> 00:03:32,340
you know and that effect isn't just the

85
00:03:36,350 --> 00:03:34,500
purview of astronauts all people can

86
00:03:38,750 --> 00:03:36,360
appreciate this land that supports us

87
00:03:41,149 --> 00:03:38,760
and the life that it supports and so

88
00:03:44,030 --> 00:03:41,159

that's probably the biggest change for

89

00:03:45,530 --> 00:03:44,040

me is I to connect people well I could

90

00:03:46,789 --> 00:03:45,540

have experienced it even more if you

91

00:03:48,530 --> 00:03:46,799

would just snuck me in the back of your

92

00:03:50,270 --> 00:03:48,540

ship I know I wish if I could have taken

93

00:03:51,530 --> 00:03:50,280

all of you I would have put us in the

94

00:03:53,089 --> 00:03:51,540

back put us in the area behind your

95

00:03:54,710 --> 00:03:53,099

heads there was a lot of room in Dragon

96

00:03:58,369 --> 00:03:54,720

definitely a lot more room than the

97

00:03:59,540 --> 00:03:58,379

soyuz but I think yeah NASA or SpaceX

98

00:04:10,330 --> 00:03:59,550

folks would cause
