

United Arab Emirates (UAE)

Astronaut Candidate Training Highlight Reel

Nora AlMatrooshi and Mohammad AlMulla

1
00:00:12,290 --> 00:00:11,270
I'm grabbing the roof twisting it to the

2
00:00:18,470 --> 00:00:12,300
right

3
00:00:19,310 --> 00:00:18,480
going to take my hand go through the

4
00:00:21,050 --> 00:00:19,320
loop

5
00:00:22,070 --> 00:00:21,060
and grab the body the body's that really

6
00:00:24,890 --> 00:00:22,080
long one

7
00:00:25,849 --> 00:00:24,900
pull around through just the Hat

8
00:00:34,310 --> 00:00:25,859
I'm gonna pull the whole thing through

9
00:00:37,850 --> 00:00:36,049
we're gonna start off with the knot

10
00:00:42,250 --> 00:00:37,860
steps you got to get all five of them to

11
00:00:47,529 --> 00:00:44,450
I'll get them

12
00:00:50,110 --> 00:00:47,539
if I can pull it through then

13
00:00:52,310 --> 00:00:50,120

actually sir you got a bowl one yeah

14

00:00:53,810 --> 00:00:52,320

yeah you had to tighten it down a little

15

00:00:58,950 --> 00:00:53,820

bit and then by the time we timed it we

16

00:00:58,960 --> 00:01:08,350

[Music]

17

00:01:08,360 --> 00:01:23,710

looks good looks good

18

00:01:23,720 --> 00:01:37,510

this is not the easy stuff right

19

00:01:37,520 --> 00:01:42,210

over here

20

00:01:42,220 --> 00:01:50,950

[Music]

21

00:01:50,960 --> 00:01:58,270

you know

22

00:01:58,280 --> 00:02:04,010

I'm wondering yeah

23

00:02:08,510 --> 00:02:04,929

yeah

24

00:02:11,410 --> 00:02:08,520

they feel woozy feel like your toes

25

00:02:18,530 --> 00:02:15,470

the bottoms up let me test it longer is

26

00:02:26,650 --> 00:02:18,540

it like supposed to be how fast I was

27

00:02:30,470 --> 00:02:29,150

let you guys go on inside warm up drink

28

00:02:32,030 --> 00:02:30,480

some water go to the bathroom hang out

29

00:02:33,710 --> 00:02:32,040

for a little bit uh wait about 15

30

00:02:43,610 --> 00:02:33,720

minutes and then we'll come on back to

31

00:02:50,690 --> 00:02:47,270

pretty much gives us a 3d 3d effect to a

32

00:02:52,130 --> 00:02:50,700

2d visual is what it is okay so you know

33

00:02:53,509 --> 00:02:52,140

when things come up to like little

34

00:02:55,970 --> 00:02:53,519

circles like that what is that going to

35

00:02:57,350 --> 00:02:55,980

indicate yeah it's going to be a Hilltop

36

00:02:58,550 --> 00:02:57,360

is what it is or something like that and

37

00:03:00,050 --> 00:02:58,560

if you have multiple ones right here

38

00:03:01,550 --> 00:03:00,060

it's going to be a ridge the closer

39

00:03:04,009 --> 00:03:01,560

these contour lines get together what do

40

00:03:05,509 --> 00:03:04,019

you think it's very steep what do you

41

00:03:07,250 --> 00:03:05,519

think they call that right there yeah

42

00:03:09,589 --> 00:03:07,260

you'll just have to figure out what kind

43

00:03:11,149 --> 00:03:09,599

of glue and what works best

44

00:03:12,710 --> 00:03:11,159

do both

45

00:03:20,210 --> 00:03:12,720

pieces

46

00:03:37,550 --> 00:03:20,220

okay we'll kind of move down to the

47

00:03:43,369 --> 00:03:40,670

okay and so I like to put the trick on

48

00:03:45,229 --> 00:03:43,379

my wrist up against my shin so kind of

49

00:03:48,949 --> 00:03:45,239

like that so I create like a nice little

50

00:03:53,930 --> 00:03:50,589

oh yourself

51
00:03:58,930 --> 00:03:53,940
nice and slow you got it from there

52
00:03:58,940 --> 00:04:12,160
we go so you're getting it now

53
00:04:16,750 --> 00:04:13,330
[Applause]

54
00:04:18,949 --> 00:04:16,760
just place that in the center of it

55
00:04:31,689 --> 00:04:18,959
completely you need a small little court

56
00:04:39,409 --> 00:04:34,430
so we got your Steel

57
00:04:44,170 --> 00:04:41,810
there you go you got a bird nest

58
00:04:47,450 --> 00:04:44,180
okay yep

59
00:04:56,530 --> 00:04:47,460
yep and there you go very nice let me

60
00:05:01,850 --> 00:04:59,689
did you get it

61
00:05:04,310 --> 00:05:01,860
foamy layer oh actually this is a dead

62
00:05:07,070 --> 00:05:04,320
pine tree so I'll show it on a pine tree

63
00:05:08,150 --> 00:05:07,080

that doesn't have a really gross rotten

64

00:05:10,730 --> 00:05:08,160

cambium layer because then you guys

65

00:05:12,409 --> 00:05:10,740

probably won't want to eat it so we'll

66

00:05:13,850 --> 00:05:12,419

uh change gears and we'll look at this

67

00:05:15,830 --> 00:05:13,860

the older portion of the blueberry plant

68

00:05:17,450 --> 00:05:15,840

uh just look like that regular sort of

69

00:05:18,830 --> 00:05:17,460

tree-like bark but as it gets to all

70

00:05:21,350 --> 00:05:18,840

that new growth it's got that really

71

00:05:22,670 --> 00:05:21,360

bright green uh look to it almost

72

00:05:24,469 --> 00:05:22,680

walking through notice a little bit

73

00:05:25,850 --> 00:05:24,479

bigger animal more for like a rabbit a

74

00:05:28,129 --> 00:05:25,860

raccoon we're going to do four fingers

75

00:05:30,469 --> 00:05:28,139

in that all right for about that size

76

00:05:31,670 --> 00:05:30,479

animal so once again very easy out of

77

00:05:35,029 --> 00:05:31,680

stake in the ground I have my second

78

00:05:39,290 --> 00:05:35,039

toggle animal pulls it pulls it off

79

00:05:41,990 --> 00:05:39,300

okay so find our location make sure

80

00:05:44,090 --> 00:05:42,000

everybody's good to go so we can report

81

00:05:46,070 --> 00:05:44,100

that and then we're going to call in our

82

00:05:47,930 --> 00:05:46,080

May Day call all right when we get on

83

00:05:50,510 --> 00:05:47,940

the radio and we say mayday mayday

84

00:05:53,510 --> 00:05:50,520

mayday whatever your call sign is

85

00:05:56,150 --> 00:05:53,520

um we are location

86

00:05:59,570 --> 00:05:56,160

Delta Romeo whatever the identifiers are

87

00:06:01,010 --> 00:05:59,580

and then the most extensive grid if you

88

00:06:04,730 --> 00:06:01,020

can give them an eight digit grip going

89

00:06:07,430 --> 00:06:04,740

to be your debrief all right and for us

90

00:06:09,409 --> 00:06:07,440

in the military that recovery site isn't

91

00:06:12,830 --> 00:06:09,419

named and marked as a recovery site

92

00:06:14,570 --> 00:06:12,840

until the reintegration process is over

93

00:06:16,749 --> 00:06:14,580

because they want to be able to put down

94

00:06:24,670 --> 00:06:16,759

all the pertinent

95

00:06:30,890 --> 00:06:27,529

150. it's one of the degrees is a little

96

00:06:33,590 --> 00:06:30,900

bit more but right so

97

00:06:35,629 --> 00:06:33,600

um orange North we know we were off this

98

00:06:39,469 --> 00:06:35,639

main road kind of in this area right

99

00:06:42,249 --> 00:06:39,479

yeah remember this

100

00:07:19,749 --> 00:06:44,390

you can do it

101
00:07:26,870 --> 00:07:23,029

okay just lay down

102
00:07:31,189 --> 00:07:28,610

you guys you know somebody else get on

103
00:07:37,969 --> 00:07:31,199

the other side no no go to the other

104
00:07:42,890 --> 00:07:39,290

it's ready that's enough that's good

105
00:07:58,180 --> 00:07:42,900

yeah it's not slipping yeah good to go

106
00:07:58,190 --> 00:08:55,210

[Music]

107
00:09:00,710 --> 00:08:58,250

you are talking about that one

108
00:09:02,930 --> 00:09:00,720

with that this is the open area yeah

109
00:09:05,449 --> 00:09:02,940

where things things pinch up and we can

110
00:09:10,730 --> 00:09:05,459

look out on to this yeah yeah you see

111
00:09:15,769 --> 00:09:13,790

all right so we started up here all

112
00:09:17,750 --> 00:09:15,779

right

113
00:09:19,790 --> 00:09:17,760

where was your shirt going at yeah

114

00:09:23,449 --> 00:09:19,800

that's the outer second one okay so

115

00:09:25,930 --> 00:09:23,459

right here so up in front of us right

116

00:09:28,250 --> 00:09:25,940

about there is gonna be see how that

117

00:09:29,750 --> 00:09:28,260

contouring immediately let's continue on

118

00:09:33,410 --> 00:09:29,760

another

119

00:09:37,850 --> 00:09:35,269

200 meters until this opens up a bit

120

00:09:40,190 --> 00:09:37,860

more and then we'll go down more gently

121

00:09:43,009 --> 00:09:40,200

okay perfect

122

00:09:45,710 --> 00:09:43,019

and it's open here but it's like yeah

123

00:10:58,329 --> 00:09:45,720

better than the Steep descent through

124

00:10:58,339 --> 00:11:17,509

this time

125

00:11:21,650 --> 00:11:19,550

the only other thing to watch out for in

126

00:11:23,509 --> 00:11:21,660

the dive soup should be involved in it

127

00:11:25,250 --> 00:11:23,519

but when you're translating the Note 3

128

00:11:27,530 --> 00:11:25,260

we have to move the donning stand out

129

00:11:28,550 --> 00:11:27,540

and put the back up in so if if they

130

00:11:29,750 --> 00:11:28,560

haven't gotten that done by the time

131

00:11:52,870 --> 00:11:29,760

y'all are translating then we'll

132

00:11:57,650 --> 00:11:56,090

I didn't feel a thing

133

00:12:01,090 --> 00:11:57,660

yeah I felt like

134

00:12:04,850 --> 00:12:01,100

something caught on my right yeah

135

00:12:08,569 --> 00:12:04,860

give me a good shoulder shrug right

136

00:12:08,579 --> 00:12:12,590

how does

137

00:12:17,090 --> 00:12:14,090

there we go

138

00:12:19,790 --> 00:12:17,100

are y'all happy with it I'm always happy

139

00:12:21,590 --> 00:12:19,800

you had me on the first one yeah no

140

00:12:25,069 --> 00:12:21,600

after I bought them again all right

141

00:12:25,079 --> 00:12:29,090

here are you taking that one

142

00:12:29,100 --> 00:12:33,170

let me guess

143

00:12:33,180 --> 00:12:36,710

all right

144

00:12:36,720 --> 00:13:44,329

yep perfect

145

00:13:44,339 --> 00:13:54,050

right

146

00:13:54,060 --> 00:13:57,430

here

147

00:13:57,440 --> 00:14:51,290

sorry buddy

148

00:14:51,300 --> 00:15:21,290

foreign

149

00:15:21,300 --> 00:15:29,290

[Music]

150

00:15:34,490 --> 00:15:32,930

check locking collar lock position

151
00:15:36,370 --> 00:15:34,500
simulated lock

152
00:15:39,350 --> 00:15:36,380
check forward right there

153
00:15:43,990 --> 00:15:39,360
forward visible

154
00:15:49,610 --> 00:15:46,850
check forward right band visible what

155
00:15:51,769 --> 00:15:49,620
would you like that perform full test

156
00:15:54,050 --> 00:15:51,779
stay clear of button and release the

157
00:15:58,370 --> 00:15:55,189
assistant

158
00:16:02,530 --> 00:15:58,380
like I want to take a look at it

159
00:16:08,290 --> 00:16:05,329
like do this entire thing

160
00:16:15,350 --> 00:16:11,629
yeah is there any other thing that you

161
00:16:15,360 --> 00:16:35,689
um

162
00:16:35,699 --> 00:17:05,590
foreign

163
00:17:11,630 --> 00:17:08,630

so the other thing is up in the front

164

00:17:15,169 --> 00:17:11,640

there's going to be can be stowed down

165

00:17:18,829 --> 00:17:15,179

there are different size NDM boxes and

166

00:17:22,990 --> 00:17:18,839

then so these little mechanisms they can

167

00:17:28,010 --> 00:17:26,150

and then you'll float and you'll be on

168

00:17:30,590 --> 00:17:28,020

orbit and you'll say what in the world

169

00:17:32,150 --> 00:17:30,600

is this thing you know say oh it's a

170

00:17:35,409 --> 00:17:32,160

part of this 6B

171

00:17:38,650 --> 00:17:35,419

cover Box Thing

172

00:17:41,630 --> 00:17:38,660

another config

173

00:17:44,810 --> 00:17:41,640

that you guys are talking about and you

174

00:17:47,390 --> 00:17:44,820

can see the safety tether line is going

175

00:17:50,690 --> 00:17:47,400

to the face of the handrail

176

00:17:54,190 --> 00:17:50,700

that this apfr is attached

177

00:17:56,930 --> 00:17:54,200

it's water usage very very corroded

178

00:17:58,789 --> 00:17:56,940

but it has on top of it a grapple

179

00:18:01,970 --> 00:17:58,799

fixture all these grapple fixtures what

180

00:18:05,150 --> 00:18:01,980

they do is they allow the ssrms to

181

00:18:06,590 --> 00:18:05,160

gravel to Grapple larger or use and

182

00:18:09,590 --> 00:18:06,600

payloads and things then you kind of

183

00:18:12,950 --> 00:18:09,600

slide this over the bolts and then kind

184

00:18:14,990 --> 00:18:12,960

of Drive the boats to finish it down and

185

00:18:18,350 --> 00:18:15,000

so that's why you have your little

186

00:18:24,890 --> 00:18:21,590

as well because we only have two of each

187

00:18:27,409 --> 00:18:24,900

on orbit so for the oreu bike they have

188

00:18:29,150 --> 00:18:27,419

their homes typically these are stowed

189

00:18:40,010 --> 00:18:29,160
on the ATA

190

00:18:45,350 --> 00:18:43,370
maybe I can't

191

00:18:47,650 --> 00:18:45,360
you have yours out

192

00:18:51,909 --> 00:18:47,660
okay

193

00:18:55,130 --> 00:18:51,919
maybe I haven't Maybe

194

00:19:00,230 --> 00:18:55,140
Nora's got it can I try

195

00:19:00,240 --> 00:19:06,529
it's got Nimble fingers

196

00:19:06,539 --> 00:19:15,470
no it's stuck

197

00:19:20,950 --> 00:19:18,169
no worries we don't have to get it

198

00:19:25,010 --> 00:19:20,960
oh yeah

199

00:19:26,750 --> 00:19:25,020
it's a hammer or something huh

200

00:19:29,570 --> 00:19:26,760
and you don't even have to pull them up

201

00:19:41,750 --> 00:19:29,580

to install it okay

202

00:19:41,760 --> 00:19:57,610

um
