

1
00:00:01,350 --> 00:00:02,990

\h (Music)

2
00:00:02,990 --> 00:00:08,850

\h Engines on... five... four...three... two... all engines running...

3
00:00:08,850 --> 00:00:13,080

\h (Rumbling)

4
00:00:13,080 --> 00:00:14,350

\h George Diller:

5
00:00:14,350 --> 00:00:19,460

\h A rich history...

6
00:00:19,460 --> 00:00:21,310

\h A promising future...

7
00:00:21,310 --> 00:00:23,810

\h Building on a successful past...

8
00:00:23,810 --> 00:00:26,610

\h Preparing for an astonishing future...

9
00:00:26,610 --> 00:00:34,080

\h NASA's Kennedy Space Center in Florida -- ready for the future today!

10
00:00:34,080 --> 00:00:39,420

\h A unique location, the center spans 140,000 acres, encompassing a national

11
00:00:39,420 --> 00:00:44,870

\h wildlife refuge -- a place where nature meets technology -- as American as the

12
00:00:44,870 --> 00:00:49,610

\h bald eagles that nest just miles from the launch pads.

13
00:00:49,610 --> 00:00:53,650

\h The only place where astronauts are launched aboard space shuttles -- our

14

00:00:53,650 --> 00:00:56,240

\h highly skilled work force at Kennedy Space Center does that.

15

00:00:56,240 --> 00:00:58,850

\h (Sonic booms)

16

00:00:58,850 --> 00:01:05,310

\h And helps guide them safely back to Earth at mission's end.

17

00:01:05,310 --> 00:01:10,130

\h Technicians prepare each new component destined for the International Space

18

00:01:10,130 --> 00:01:15,430

\h Station -- as the orbiting outpost nears completion.

19

00:01:15,430 --> 00:01:19,530

\h Kennedy is the home to the Launch Services Program -- launching probes and

20

00:01:19,530 --> 00:01:24,560

\h satellites that explore the far reaches of the universe -- and teach us more about

21

00:01:24,560 --> 00:01:27,220

\h our home planet.

22

00:01:27,220 --> 00:01:31,430

\h Constellation -- the changing face of Kennedy Space Center -- preparing and

23

00:01:31,430 --> 00:01:36,190

\h launching the next generation of space vehicles that will take astronauts back to

24

00:01:36,190 --> 00:01:38,710

\h the moon and journeys beyond...

25

00:01:38,710 --> 00:01:43,010

\h Reaching out -- sharing America's space program with the world...

26

00:01:43,010 --> 00:01:47,250

\h Fueling the spirit of exploration in the next generation...
