

1

00:00:01,710 --> 00:00:16,690

\h George Diller/STS-129 Landing Commentator: And here comes the crew. Charlie Bolden, our administrator,

2

00:00:16,690 --> 00:00:22,450

\h Angie Brewer, the flow director. Mike Leinbach, the NASA launch director.

3

00:00:22,450 --> 00:00:30,540

\h Bob Cabana, the director of the Kennedy Space Center.

4

00:00:30,540 --> 00:00:36,440

\h Butch Wilmore, our pilot, along with Steve Payne, our NASA test director, and

5

00:00:36,440 --> 00:00:44,580

\h Pete Nickolenko, the manager of the NASA Test Director's Office.

6

00:00:44,580 --> 00:00:49,960

\h Got word that the Crew Transport Vehicle with Nicole Stott is about to leave the runway and head

7

00:00:49,960 --> 00:00:57,530

\h back to the astronaut quarters and the crew will go back in the Astrovan.

8

00:00:57,530 --> 00:01:00,760

\h Charlie Hobaugh/STS-129 Commander: Hey. Good morning. We wanted to just say a couple words.

9

00:01:00,760 --> 00:01:12,430

\h I don't even know how I can put this, but we really had truly an amazing mission. It was not us. It was not

10

00:01:12,430 --> 00:01:15,780

\h But it was just an incredible team from all around the nation.

11

00:01:15,780 --> 00:01:22,970

\h Just talking to someone under the vehicle and it's not about JSC, it's not about KSC,

12

00:01:22,970 --> 00:01:32,030

\h it's not about Marshall, Stennis, any of that. It's one huge integrated team that really makes something li

13  
00:01:32,030 --> 00:01:37,860  
\h We were lucky. I mean, part of it's luck and part of it's pure great skill

14  
00:01:37,860 --> 00:01:41,400  
\h workmanship in processing Atlantis and getting it ready for us.

15  
00:01:41,400 --> 00:01:48,270  
\h We had no hitches. We went off on time. We landed on time. The station's an amazing place.

16  
00:01:48,270 --> 00:01:58,190  
\h I have a cast of five around me that truly made my life simple. I did nothing but drive the bus a couple times.

17  
00:01:58,190 --> 00:02:05,800  
\h These guys did all the work. They were awesome. So I was extremely lucky. Nicole came back with us.

18  
00:02:05,800 --> 00:02:11,210  
\h She's headed back to see her family. And she did an amazing job on station.

19  
00:02:11,210 --> 00:02:15,130  
\h Station itself is just incredible, just like the shuttle.

20  
00:02:15,130 --> 00:02:20,370  
\h It's truly an amazing vehicle and it's an incredible thrill to be able to participate in something like this.

21  
00:02:20,370 --> 00:02:25,080  
\h And it can't happen without the tens of thousands of people that pour their hearts and souls into the

22  
00:02:25,080 --> 00:02:33,300  
\h space program that support us and make something like this happen. So we just want to thank you all, a

23  
00:02:33,300 --> 00:02:38,720  
\h George Diller/STS-129 Landing  
Commentator: Astronauts going back for a brief reunion with
