

1

00:00:00,570 --> 00:00:04,370

Chris Ferguson/CAPCOM: You're "go" for the deorbit burn.

2

00:00:04,430 --> 00:00:07,630

Charlie Hobaugh/STS-129 Commander: Thanks. We're "go" for the deorbit burn. And we copy your notes

3

00:00:07,830 --> 00:00:11,963

about the two things. Thank you. Comm and the roll excursions.

4

00:00:13,630 --> 00:00:16,270

Brandi Dean/STS-129 Commentator: That call from CAPCOM Chris Ferguson to Commander Charlie Hobaugh

5

00:00:17,590 --> 00:00:18,973

confirming that the team here on the ground does in fact see that everything looks good for today's landing of

6

00:00:23,540 --> 00:00:24,093

space shuttle Atlantis. Weather and shuttle systems all performing well. And in the weather's case -- clear

7

00:00:30,120 --> 00:00:37,386

enough and visibility good, winds low enough -- that landing should not be a problem, scheduled for 8:44 a.m.

8

00:00:38,030 --> 00:00:45,496

CST. And that call again gave the crew the "go" to fire the shuttle's orbital maneuvering system engines at 7:37
