

1

00:00:01,560 --> 00:00:05,120

\h Allard Beutel/STS-130 Launch

Commentator: Right now we take you to the Operations and Checkout Building.

2

00:00:05,120 --> 00:00:14,300

\h We see the STS-130 commander, George Zamka, getting suited up.

3

00:00:14,300 --> 00:00:22,630

\h Finished up their weather briefing about five minutes ago and headed over to final suit-up. Endeavour's

4

00:00:22,630 --> 00:00:28,060

\h Terry Virts, getting on their orange launch-and-entry suits that are officially

5

00:00:28,060 --> 00:00:35,000

\h known as advanced crew escape system, ACES, suit.

6

00:00:35,000 --> 00:00:38,000

\h Of course, they affectionately refer to them as pumpkin suits.

7

00:00:38,000 --> 00:00:47,790

\h Bob Behnken will be the lead spacewalker for all three spacewalks on the STS-130 mission.

8

00:00:47,790 --> 00:00:52,770

\h A little more thumbs-up, and then, perhaps because hearing the forecast this time around,

9

00:00:52,770 --> 00:01:14,160

\h things are a little more A-OK this time than they were last night. Mission Specialist Kay Hire there, getting

10

00:01:14,160 --> 00:01:27,880

\h Each suit technician from the flight crew equipment office is assigned to each astronaut, one per astronaut

11

00:01:27,880 --> 00:01:38,780

\h Nickolas Patrick, almost on a knee there and all smiles. He'll be also on all three

12

00:01:38,780 --> 00:01:46,570

\h spacewalks on this particular mission, first for him on spacewalks.

13

00:01:46,570 --> 00:01:57,650

\h And finally, Steve Robinson, veteran space flier of this particular crew, making his fourth flight.

14

00:01:57,650 --> 00:02:05,540

\h He'll be assisting the spacewalks from inside the space station.

15

00:02:05,540 --> 00:02:14,900

\h As they pan around and look at the suit-up room in the Operations and Checkout Building.

16

00:02:14,900 --> 00:02:26,670

\h And there are the six astronauts for Endeavour's STS-130 mission, making their way down the hallway

17

00:02:26,670 --> 00:02:32,880

\h Followed by Jerry Ross, in charge of their,  
when they're down here at the

18

00:02:32,880 --> 00:02:42,010

\h Kennedy Space Center -- seven-time flown astronaut himself.

19

00:02:42,010 --> 00:02:50,860

\h About to say goodbye from the elevator, there we go.

20

00:02:50,860 --> 00:02:54,090

\h There will be several other people who will  
be riding along with the astronauts on the

21

00:02:54,090 --> 00:02:58,800

\h way to the pad, including astronaut Chris Ferguson,

22

00:02:58,800 --> 00:03:03,620

\h the deputy chief of the Astronaut Office, will  
be doing the weather reconnaissance flights.

23

00:03:03,620 --> 00:03:09,370

\h They'll drop him off. And here's Endeavour's STS-130 crew.

24

00:03:09,370 --> 00:03:46,600

\h (Cheers)

25

00:03:46,600 --> 00:03:48,680

\h Allard Beutel/STS-130 Launch Commentator: And you can see the head of the Astronaut Office,

26

00:03:48,680 --> 00:03:58,920

\h Peggy Whitson, along with one of the members of the closeout crew in the white overalls.

27

00:03:58,920 --> 00:04:06,150

\h In that shot you can see them, there's obviously a lot of media who are there to watch walkout as it's kn

28

00:04:06,150 --> 00:04:10,460

\h And an awful lot of well-wishers -- employees, friends,

29

00:04:10,460 --> 00:04:13,800

\h people who are obviously supporting the  
crews -- want to make sure that the

30

00:04:13,800 --> 00:04:16,820

\h astronauts know that they are behind them and want to
