

U. 7:28

Mission Control Center

U- 7:28

NASA

1
00:00:05,990 --> 00:00:03,429
atlantis uh update on the weather uh

2
00:00:07,909 --> 00:00:06,000
things are shaping up real nice the

3
00:00:11,830 --> 00:00:07,919
storms that were to the north

4
00:00:12,470 --> 00:00:11,840
north west have dissipated and slowed

5
00:00:14,230 --> 00:00:12,480
down

6
00:00:17,670 --> 00:00:14,240
they shouldn't penetrate the 30 mile

7
00:00:19,830 --> 00:00:17,680
circle by the time we're interested in

8
00:00:20,790 --> 00:00:19,840
we have already pulled the room room and

9
00:00:23,910 --> 00:00:20,800
you are go

10
00:00:25,029 --> 00:00:23,920
for the deorbit burn and copy go for the

11
00:00:28,230 --> 00:00:25,039
deorbit burn

12
00:00:30,470 --> 00:00:28,240
next up the team here reporting that the

13
00:00:31,750 --> 00:00:30,480

deorbit burn is in progress both orbital

14

00:00:33,510 --> 00:00:31,760

maneuvering system engines are now

15

00:00:34,790 --> 00:00:33,520

firing

16

00:00:36,549 --> 00:00:34,800

this will last for three minutes and

17

00:00:37,990 --> 00:00:36,559

five seconds this will slow atlantis

18

00:00:38,790 --> 00:00:38,000

down enough that it will drop out of

19

00:00:42,150 --> 00:00:38,800

orbit

20

00:00:48,709 --> 00:00:42,160

and we'll begin the reentry process

21

00:00:52,869 --> 00:00:50,470

and hawk we'll meet you in the post-burn
