

1

00:00:00,710 --> 00:00:05,250

For the first time since July 2001, and the last time ever,

2

00:00:05,250 --> 00:00:08,379

two space shuttles are on the launch pads at the same time at

3

00:00:08,379 --> 00:00:12,559

NASA's Kennedy Space Center in Florida.

4

00:00:12,559 --> 00:00:16,740

Atlantis is targeted to liftoff on the STS-125 mission to service

5

00:00:16,740 --> 00:00:18,999

NASA's Hubble Space Telescope.

6

00:00:18,999 --> 00:00:24,550

And Endeavour is ready to act as a rescue vehicle for Atlantis, if needed.

7

00:00:24,550 --> 00:00:30,759

After Atlantis' safe landing, Endeavour will rollaround to pad 39A for its upcoming

8

00:00:30,759 --> 00:00:36,079

STS-126 mission to the International Space Station.

9

00:00:36,079 --> 00:00:41,010

There may not be another dual pad event in shuttle history that matches the excitement

10

00:00:41,010 --> 00:00:45,940

and thrill of seeing these two majestic space vehicles side by side

11

00:00:45,940 --> 00:00:48,820

on Kennedy's launch pads.
