

1
00:00:01,209 --> 00:00:02,209
STS-125 Hubble Payload CEIT Podcast Script

2
00:00:02,209 --> 00:00:03,209
Practice Makes Perfect

3
00:00:03,209 --> 00:00:07,380
Crew members of space shuttle Atlantis flew
to NASA's Kennedy Space Center on

4
00:00:07,380 --> 00:00:13,210
Sept. 5, 2008 to check out the payload carriers,
new science instruments

5
00:00:13,210 --> 00:00:17,619
and tools they'll be using to repair the Hubble
Space Telescope and enhance

6
00:00:17,619 --> 00:00:20,499
its ability and functionality.

7
00:00:20,499 --> 00:00:24,679
This hands-on preflight exercise is called
a crew familiarization,

8
00:00:24,679 --> 00:00:27,739
or Payload Crew Equipment Interface Test.

9
00:00:27,739 --> 00:00:32,980
The Payload CEIT gave the crew a hands-on
opportunity to inspect Hubble's hardware

10
00:00:32,980 --> 00:00:37,350
and offer suggestions to alter repair techniques,
if needed.

11
00:00:37,350 --> 00:00:42,550
If practice makes perfect, the Atlantis astronauts
will be well-prepared to take on the

12

00:00:42,550 --> 00:00:47,780

extraordinary responsibility of giving Hubble
an even better view of the universe for many

13

00:00:47,780 --> 00:00:49,480

more years to come.
