

An American Treasure: The Shuttle

1
00:00:05,900 --> 00:00:02,659
I'm Angie Brewer and I'm the flow

2
00:00:08,600 --> 00:00:05,910
director for Atlantis NASA I'd have to

3
00:00:11,570 --> 00:00:08,610
say the Hubble mission was one of my

4
00:00:14,240 --> 00:00:11,580
favorite just being a part of that it

5
00:00:16,640 --> 00:00:14,250
was very intensive it was a very

6
00:00:19,939 --> 00:00:16,650
difficult mission and you know we had to

7
00:00:21,260 --> 00:00:19,949
roll back for that one but this is we

8
00:00:23,330 --> 00:00:21,270
had to do it twice I think that made it

9
00:00:25,790 --> 00:00:23,340
more memorable than any of them when I

10
00:00:28,070 --> 00:00:25,800
first came to work here my office was in

11
00:00:31,070 --> 00:00:28,080
this building and since then they've

12
00:00:34,970 --> 00:00:31,080
moved all the offices out of here for

13
00:00:36,860 --> 00:00:34,980

safety reasons but I remember you know

14

00:00:38,600 --> 00:00:36,870

just coming in here and getting lost

15

00:00:40,850 --> 00:00:38,610

because there's no there's so many

16

00:00:43,369 --> 00:00:40,860

little nooks and crannies it's such a

17

00:00:45,080 --> 00:00:43,379

huge building you know I've always said

18

00:00:46,760 --> 00:00:45,090

that I think one of the jobs that I'd

19

00:00:48,290 --> 00:00:46,770

love to have is to be a facility manager

20

00:00:49,850 --> 00:00:48,300

of this building because it's got so

21

00:00:51,819 --> 00:00:49,860

much history and it's just an amazing

22

00:00:54,170 --> 00:00:51,829

building and I don't think you could

23

00:00:55,729 --> 00:00:54,180

find every you know and take you years

24

00:00:59,360 --> 00:00:55,739

and years to walk this whole place down

25

00:01:02,450 --> 00:00:59,370

it's so big actually I sign the wall

26
00:01:04,579 --> 00:01:02,460
while back and there's a team that the

27
00:01:05,910 --> 00:01:04,589
morale team that actually this was an

28
00:01:09,630 --> 00:01:05,920
idea of theirs and

29
00:01:11,940 --> 00:01:09,640
and we put this together and and I think

30
00:01:14,249 --> 00:01:11,950
it's still know her really well you know

31
00:01:16,950 --> 00:01:14,259
this everybody that's worked on shuttle

32
00:01:18,570 --> 00:01:16,960
over the years you know they come over

33
00:01:20,370 --> 00:01:18,580
here and you know they're a part of

34
00:01:23,219 --> 00:01:20,380
history and hopefully this'll you know

35
00:01:24,840 --> 00:01:23,229
help them remember and people can come

36
00:01:27,320 --> 00:01:24,850
here in the future and see that all the

37
00:01:29,910 --> 00:01:27,330
people that were here in pardon me in

38
00:01:33,270 --> 00:01:29,920

helping the show launch and land and

39

00:01:35,490 --> 00:01:33,280

process it safely actually the people

40

00:01:38,700 --> 00:01:35,500

that work on Atlantis you know we kind

41

00:01:40,320 --> 00:01:38,710

of tried to say you know all together so

42

00:01:41,460 --> 00:01:40,330

we we just you know they put up a

43

00:01:43,139 --> 00:01:41,470

template for us and we kind of all

44

00:01:46,020 --> 00:01:43,149

signed us a little group you know and

45

00:01:47,760 --> 00:01:46,030

just because you know that we've worked

46

00:01:49,469 --> 00:01:47,770

with each other for so many years and we

47

00:01:51,059 --> 00:01:49,479

thought it'd be nice to just give the

48

00:01:52,620 --> 00:01:51,069

groups that we could find the eat you

49

00:01:54,570 --> 00:01:52,630

know everybody signature that we work

50

00:01:56,160 --> 00:01:54,580

with over the years but it's nice going

51
00:01:57,660 --> 00:01:56,170
through and sand you know every time I

52
00:01:59,399 --> 00:01:57,670
come over here there's more signatures

53
00:02:01,020 --> 00:01:59,409
than finding somebody that you know

54
00:02:04,499 --> 00:02:01,030
assigned it that I haven't seen for many

55
00:02:06,120 --> 00:02:04,509
years and it's pretty neat and we're

56
00:02:08,850 --> 00:02:06,130
trying to make a key so that everybody

57
00:02:10,410 --> 00:02:08,860
can find their their their signature

58
00:02:12,120 --> 00:02:10,420
later on so we're working on a key so

59
00:02:14,580 --> 00:02:12,130
that everybody will have a place of ill

60
00:02:16,530 --> 00:02:14,590
know where they can find their signature

61
00:02:17,880 --> 00:02:16,540
what they lose their spot and and if

62
00:02:19,229 --> 00:02:17,890
they want to find a friend and see where

63
00:02:21,030 --> 00:02:19,239

they signed so we're trying to make a
