1  
00:00:04,910 --> 00:00:01,910  
hello I'm Dean Millsaps I'm electrical

2  
00:00:08,299 --> 00:00:04,920  
engineer the avionics design team we

3  
00:00:11,959 --> 00:00:08,309  
have been testing camera systems that

4  
00:00:13,400 --> 00:00:11,969  
are flying now and will fly and so part

5  
00:00:16,369 --> 00:00:13,410  
of the testing was to go on top of the

6  
00:00:18,769 --> 00:00:16,379  
VAB and record the launches several of

7  
00:00:20,570 --> 00:00:18,779  
them and when I'm was the night launch

8  
00:00:24,019 --> 00:00:20,580  
watching the moon come up and of course

9  
00:00:25,820 --> 00:00:24,029  
also watching the Ares take off but the

10  
00:00:28,070 --> 00:00:25,830  
the greatest one was the shuttle that

11  
00:00:29,929 --> 00:00:28,080  
that takes off the first one I was

12  
00:00:32,569 --> 00:00:29,939  
tracking and and of course I've got a

13  
00:00:35,090 --> 00:00:32,579

good pan but as soon as the shock waves

14

00:00:37,220 --> 00:00:35,100

hit me and the excitement of it all I

15

00:00:38,600 --> 00:00:37,230

just lost complete control and just was

16

00:00:41,510 --> 00:00:38,610

tracking all over the place trying to
