

1
00:00:04,820 --> 00:00:02,600
my name is Denise meadows I'm currently

2
00:00:06,740 --> 00:00:04,830
working in the OPF swear I've spent most

3
00:00:08,870 --> 00:00:06,750
of my time out here at the Space Center

4
00:00:11,530 --> 00:00:08,880
oh goodness well I've been out here

5
00:00:14,990 --> 00:00:11,540
since 1979 for the first shuttle launch

6
00:00:16,400 --> 00:00:15,000
and I've worked every vehicle in

7
00:00:18,800 --> 00:00:16,410
processing because I've been doing

8
00:00:22,220 --> 00:00:18,810
process planning I guess one of the most

9
00:00:25,250 --> 00:00:22,230
interesting ones was the 100th mission

10
00:00:28,310 --> 00:00:25,260
processing that we did for discovery

11
00:00:31,700 --> 00:00:28,320
that was ov 103 which was how we refer

12
00:00:34,069 --> 00:00:31,710
to them it was really interesting to see

13
00:00:35,180 --> 00:00:34,079

everything once it was done and the fact

14

00:00:37,370 --> 00:00:35,190

that they followed it all the way from

15

00:00:39,170 --> 00:00:37,380

you know wound to tomb the beginning to

16

00:00:41,389 --> 00:00:39,180

the end when we actually launched it

17

00:00:43,340 --> 00:00:41,399

that was one of the best things to sign

18

00:00:46,430 --> 00:00:43,350

my name on the wall but then when I

19

00:00:49,160 --> 00:00:46,440

found out that I could sign my family

20

00:00:52,310 --> 00:00:49,170

members to who are no longer here that

21

00:00:54,470 --> 00:00:52,320

was even better because actually every

22

00:00:56,330 --> 00:00:54,480

member of my family other than my kids

23

00:00:59,569 --> 00:00:56,340

have worked out here at one point or

24

00:01:02,869 --> 00:00:59,579

another so it was really cool to be able

25

00:01:06,890 --> 00:01:02,879

to put them all up there I used to work

26
00:01:08,660 --> 00:01:06,900
second shift here when I was because i

27
00:01:11,240 --> 00:01:08,670
started in logistics and then went to

28
00:01:12,950 --> 00:01:11,250
process planning and i was second shift

29
00:01:15,920 --> 00:01:12,960
in here and I do remember I don't know

30
00:01:17,630 --> 00:01:15,930
if this is a shuttle memory but one

31
00:01:19,640 --> 00:01:17,640
evening we came into work and the air

32
00:01:22,039 --> 00:01:19,650
conditioner had broke which was actually

33
00:01:23,870 --> 00:01:22,049
probably a thankful thing because it was

34
00:01:25,730 --> 00:01:23,880
a winter time and the air conditioner

35
00:01:27,620 --> 00:01:25,740
had broke and it was already cold in

36
00:01:29,420 --> 00:01:27,630
there to begin with but the whole bottom

37
00:01:32,330 --> 00:01:29,430
floor flooded when that happened because

38
00:01:34,880 --> 00:01:32,340

its water based and we had to vacate for

39

00:01:36,440 --> 00:01:34,890

the evening so that was real interesting
