

...n Treasure: The Space Shuttle

1  
00:00:04,630 --> 00:00:02,310  
my name is douglas hendrickson

2  
00:00:06,950 --> 00:00:04,640  
i worked for the chief counsel's office

3  
00:00:08,230 --> 00:00:06,960  
as the deputy chief counsel retiring two

4  
00:00:11,270 --> 00:00:08,240  
years ago

5  
00:00:13,910 --> 00:00:11,280  
my favorite shuttle uh memory is

6  
00:00:15,829 --> 00:00:13,920  
i was on many source boards but

7  
00:00:17,670 --> 00:00:15,839  
the one sore spotter i remember the most

8  
00:00:18,870 --> 00:00:17,680  
was when we were buying the cranes for

9  
00:00:21,510 --> 00:00:18,880  
the uh

10  
00:00:23,109 --> 00:00:21,520  
for the high bays and uh they were going

11  
00:00:23,990 --> 00:00:23,119  
to put the new cranes in through the

12  
00:00:26,550 --> 00:00:24,000  
roof

13  
00:00:27,990 --> 00:00:26,560

and uh

14

00:00:29,429 --> 00:00:28,000

although i'm not an engineer i'm a

15

00:00:31,830 --> 00:00:29,439

lawyer i told them i thought that was

16

00:00:34,630 --> 00:00:31,840

crazy and uh why didn't they use the old

17

00:00:36,790 --> 00:00:34,640

apollo cranes to raise up the new

18

00:00:39,270 --> 00:00:36,800

shuttle cranes and uh

19

00:00:41,030 --> 00:00:39,280

the engineer said that was not doable

20

00:00:42,630 --> 00:00:41,040

but his boss said oh we'll take it to

21

00:00:45,270 --> 00:00:42,640

rental smith and hill and see if it's

22

00:00:47,029 --> 00:00:45,280

doable and uh they took it to reynolds

23

00:00:48,630 --> 00:00:47,039

smith and hill and they said definitely

24

00:00:50,950 --> 00:00:48,640

that's the way to go

25

00:00:52,470 --> 00:00:50,960

and i said also why are you

26

00:00:54,630 --> 00:00:52,480

salvaging the

27

00:00:56,389 --> 00:00:54,640

scrapping the old apollo cranes we can

28

00:00:57,670 --> 00:00:56,399

use them back them up on a rail and keep

29

00:00:59,670 --> 00:00:57,680

them and

30

00:01:01,590 --> 00:00:59,680

i'll have them for emergency purposes

31

00:01:03,910 --> 00:01:01,600

and rental smith and hill said yeah

32

00:01:06,630 --> 00:01:03,920

that's a great idea too so

33

00:01:08,789 --> 00:01:06,640

basically you got the apollo crane still

34

00:01:09,990 --> 00:01:08,799

up there and the new shuttle cranes and

35

00:01:12,710 --> 00:01:10,000

that was

36

00:01:14,630 --> 00:01:12,720

my contribution to the shuttle program

37

00:01:16,149 --> 00:01:14,640

or one of them anyway i was on many many

38

00:01:18,630 --> 00:01:16,159

source boards

39

00:01:20,710 --> 00:01:18,640

with the shuttle program including lps
