

# Treasure: The Space Shuttle

1  
00:00:09,709 --> 00:00:04,249  
hello I'm Joseph a brown cce certified

2  
00:00:12,080 --> 00:00:09,719  
cost engineer retired NASA USA and Corps

3  
00:00:15,589 --> 00:00:12,090  
of Engineers I worked on the Apollo

4  
00:00:17,029 --> 00:00:15,599  
program and we signed the VA be the beam

5  
00:00:19,429 --> 00:00:17,039  
at the top of the building for the

6  
00:00:21,620 --> 00:00:19,439  
Apollo program and then we came along

7  
00:00:23,029 --> 00:00:21,630  
with the shuttle and one of the things I

8  
00:00:25,880 --> 00:00:23,039  
remember about the shuttle was launched

9  
00:00:27,589 --> 00:00:25,890  
my mother-in-law's birthday that was a

10  
00:00:28,730 --> 00:00:27,599  
strange one but she was down here and

11  
00:00:30,919 --> 00:00:28,740  
just happened to be here at the right

12  
00:00:33,139 --> 00:00:30,929  
time in the right place but the shuttle

13  
00:00:35,180 --> 00:00:33,149

was something we work on so long getting

14

00:00:38,240 --> 00:00:35,190

it ready and budgeting we had the budget

15

00:00:39,889 --> 00:00:38,250

we had 20 or 30 different configurations

16

00:00:42,860 --> 00:00:39,899

we had to budget estimate for I would

17

00:00:45,260 --> 00:00:42,870

cost engineer recently we had Buzz

18

00:00:48,229 --> 00:00:45,270

Aldrin the astronaut and I had lunch

19

00:00:50,630 --> 00:00:48,239

together and we talked about the moon

20

00:00:53,840 --> 00:00:50,640

mining of helium-3 which one of the

21

00:00:57,080 --> 00:00:53,850

goals of the space were at one time but

22

00:00:58,910 --> 00:00:57,090

all quite an exciting and interesting to

23

00:01:02,270 --> 00:00:58,920

her when I went to high school we talked

24

00:01:06,020 --> 00:01:02,280

about spudnick and here again the
