

1
00:00:00,420 --> 00:00:00,749

\h

2
00:00:00,750 --> 00:00:03,689

Josh Byerly/STS-133 Descent Commentator: Space shuttle Discovery now on final approach to the

3
00:00:03,690 --> 00:00:07,290

Kennedy Space Center. Just more than 30 seconds to go.

4
00:00:19,620 --> 00:00:22,020

Discovery's gear is down and locked.

5
00:00:32,680 --> 00:00:34,013

Main gear touchdown.

6
00:00:34,570 --> 00:00:35,270

The nose of the shuttle being rotated down toward the flight deck.

7
00:00:38,270 --> 00:00:40,203

The parachute being deployed.

8
00:00:43,880 --> 00:00:47,746

And nose gear touchdown and the end of a historic journey.

9
00:00:47,750 --> 00:00:53,416

And to the ship that has led the way time and time again, we say farewell, Discovery.

10
00:01:28,970 --> 00:01:29,856

Steve Lindsey/STS-133 Commander: And Houston, Discovery for the final time, wheel stop.

11
00:01:33,950 --> 00:01:36,046

Charlie Hobaugh/CAPCOM: Discovery, Houston, Pinto, great job by you and your crew.

12
00:01:37,320 --> 00:01:38,290

That was a great landing in tough conditions and it was an awesome docked mission that you all had.

13
00:01:42,950 --> 00:01:48,150

You were able to take Discovery up to a full 365 days of actual time on orbit.

14

00:01:49,110 --> 00:01:49,993

I think you'd call that a fleet leader and a leader of any manned vehicle for time in orbit.

15

00:01:54,360 --> 00:02:00,893

So, a job well done. We'll meet you in the post-landing tab for post-landing. Currently no Deltas.

16

00:02:02,940 --> 00:02:06,310

Steve Lindsey/STS-133 Commander: And copy that. Scorch we're headed to 53 and I'd like to thank you and y

17

00:02:07,170 --> 00:02:07,366

and all the orbit teams for a fantastic mission as well as the Expedition 26 Team on orbit.
