

1
00:00:00,460 --> 00:00:06,800

Music

2
00:00:06,800 --> 00:00:13,150

Space shuttle Endeavour began its final scheduled 3.4-mile journey to Launch Pad 39A in darkness,

3
00:00:13,150 --> 00:00:18,080

leaving the Vehicle Assembly Building at NASA's Kennedy Space Center at 7:56 p.m.

4
00:00:18,080 --> 00:00:21,370

Eastern Standard Time on March 10.

5
00:00:21,370 --> 00:00:25,890

The shuttle, stacked alongside its twin solid rocket boosters and external fuel tank,

6
00:00:25,890 --> 00:00:30,580

was bathed in xenon lights as it sat atop a mobile launcher platform.

7
00:00:30,580 --> 00:00:35,120

Carried by one of the crawler-transporters, the almost eight-hour roll to the seaside

8
00:00:35,120 --> 00:00:39,270

launch pad ended about 3:49 a.m.

9
00:00:39,270 --> 00:00:44,270

At the pad, technicians will continue launch preparations during the next six weeks and the

10
00:00:44,270 --> 00:00:49,520

payload bound for the International Space Station will be loaded in the shuttle's cargo bay.

11
00:00:49,520 --> 00:00:55,010

On this, its final flight, Endeavour will deliver the Alpha Magnetic Spectrometer and various

12
00:00:55,010 --> 00:00:58,350

spare parts to the space station.

13
00:00:58,350 --> 00:01:03,180

A crew of six astronauts will conduct this 36th shuttle mission dedicated to the
