

1  
00:00:08,780 --> 00:00:07,700  
when I first came into the astronaut

2  
00:00:16,270 --> 00:00:08,790  
program was right around the time

3  
00:00:22,210 --> 00:00:19,660  
I got into the program in a decade later

4  
00:00:25,150 --> 00:00:22,220  
amazingly enough had a chance to fly on

5  
00:00:27,700 --> 00:00:25,160  
endeavour and to ride endeavour up to

6  
00:00:30,070 --> 00:00:27,710  
the International Space Station and to

7  
00:00:31,720 --> 00:00:30,080  
put on a big white suit and open the

8  
00:00:33,790 --> 00:00:31,730  
belly of endeavor and actually climb

9  
00:00:35,710 --> 00:00:33,800  
outside and crawl around the outside of

10  
00:00:37,870 --> 00:00:35,720  
that spaceship as it was docked to the

11  
00:00:39,460 --> 00:00:37,880  
space station in orbit building things

12  
00:00:42,729 --> 00:00:39,470  
on to the International Space Station

13  
00:00:44,200 --> 00:00:42,739

and then ride endeavour home and not

14

00:00:45,940 --> 00:00:44,210

back to florida we had bad weather in

15

00:00:48,160 --> 00:00:45,950

Florida but where I'd been a test pilot

16

00:00:50,020 --> 00:00:48,170

student where I'd watched my very first

17

00:00:52,869 --> 00:00:50,030

shuttle landings back on the return to

18

00:00:54,729 --> 00:00:52,879

flight after challenger we landed

19

00:00:57,070 --> 00:00:54,739

endeavour out in the desert at Edwards

20

00:01:04,400 --> 00:00:57,080

sort of almost like a complete circle of

21

00:01:10,380 --> 00:01:07,160

my flight there were three rookies and

22

00:01:12,540 --> 00:01:10,390

so it's the flight that was equivalent

23

00:01:14,969 --> 00:01:12,550

or more challenging than a Hubble flight

24

00:01:17,400 --> 00:01:14,979

and we had three rookies and our

25

00:01:19,320 --> 00:01:17,410

commander had flown once and so we were

26

00:01:24,450 --> 00:01:19,330

like I can't believe dad gave us the

27

00:01:28,260 --> 00:01:24,460

keys to the shuttle dude so it's a it's

28

00:01:29,670 --> 00:01:28,270

a privilege to fly with an as an

29

00:01:32,010 --> 00:01:29,680

inexperienced crew member with an

30

00:01:33,660 --> 00:01:32,020

experienced crew on a mission that would

31

00:01:35,810 --> 00:01:33,670

have made the mission planners from

32

00:01:38,070 --> 00:01:35,820

seven years previous just blanche to

33

00:01:45,130 --> 00:01:38,080

contemplate even with an experienced
