

1

00:00:00,950 --> 00:00:07,190

\h Allard Beutel/STS-134 Commentator: Now we have our first looks of Endeavour's crew,

2

00:00:07,190 --> 00:00:10,510

\h led by Commander Mark Kelly,

3

00:00:10,510 --> 00:00:16,400

\h Pilot Greg Johnson.

4

00:00:16,400 --> 00:00:24,200

\h Greeted first by NASA Administrator Charlie Bolden.

5

00:00:24,200 --> 00:00:29,920

\h Mission Specialist Mike Fincke, wearing the baseball cap.

6

00:00:29,920 --> 00:00:35,160

\h European Space Agency's Roberto Vittori.

7

00:00:35,160 --> 00:00:37,780

\h Drew Feustel.

8

00:00:37,780 --> 00:00:42,960

\h Making their way down the essentially receiving/greeting line.

9

00:00:42,960 --> 00:00:49,340

\h We see Bob Cabana and then behind him.

10

00:00:49,340 --> 00:00:56,660

\h Deputy Space Shuttle Program Manager LeRoy Cain talking to Mark Kelly.

11

00:00:56,660 --> 00:01:02,430

\h See from that video it's an organized, chaotic scene there.

12

00:01:02,430 --> 00:01:06,550

\h NASA Administrator Charlie Bolden talking to Mark Kelly now.

13

00:01:06,550 --> 00:01:08,050

\h Mark Kelly/STS-134 Commander: It's great to be back here

14

00:01:08,050 --> 00:01:09,270

\h at the Kennedy Space Center.

15

00:01:09,270 --> 00:01:12,560

\h It's great to bring Endeavour back in great shape.

16

00:01:12,560 --> 00:01:15,160

\h It looks like it's ready to go do another mission.

17

00:01:15,160 --> 00:01:20,010

\h But this is going to be the last flight. Mission went great.

18

00:01:20,010 --> 00:01:24,940

\h We installed the Alpha Magnetic Spectrometer, the ELC-3, so we have the station

19

00:01:24,940 --> 00:01:33,930

\h positioned to where, over the next 10, 15, 20 years, it's got the spare parts it needs to

20

00:01:33,930 --> 00:01:38,790

\h continue to doing the science that is so relevant today.

21

00:01:38,790 --> 00:01:42,020

\h AMS is already collecting data. We're pretty excited about that.

22

00:01:42,020 --> 00:01:44,510

\h Looking forward to hearing some more about it.

23

00:01:44,510 --> 00:01:50,220

\h I really want to thank my crew members who did such a spectacular job on this flight.

24

00:01:50,220 --> 00:01:55,320

\h Could not have done this without them. They all, every single one of them,

25

00:01:55,320 --> 00:01:59,590

\h just performed flawlessly.

26

00:01:59,590 --> 00:02:02,400

\h Greg H. Johnson/STS-134 Pilot: Our commander, we want to thank him, too.
