

1
00:00:03,060 --> 00:00:08,200

\h NARRATOR: The home of space shuttle Atlantis continues taking shape at the Kennedy Space Center

2
00:00:08,200 --> 00:00:11,320

\h including a space age gateway for the attraction.

3
00:00:11,320 --> 00:00:18,000

\h Using a massive crane, crews placed the nose cone atop the second of a replica pair of solid rocket boosters

4
00:00:18,000 --> 00:00:21,610

\h Each booster stands 149 feet tall.

5
00:00:21,610 --> 00:00:31,300

\h A life-size external tank model will be built between them to form a complete

6
00:00:31,300 --> 00:00:36,580

\h "stack" the same size as the ones that lifted space shuttles into orbit for 30 years.

7
00:00:36,580 --> 00:00:39,220

\h The stack, which will reach 184 feet when finished, will straddle a walkway into

8
00:00:39,220 --> 00:00:43,900

\h the Space Shuttle Atlantis attraction's main building, a new,

9
00:00:43,900 --> 00:00:48,840

\h 90,000-square-foot exhibit hall housing Atlantis itself.

10
00:00:48,840 --> 00:00:49,010

\h The orbiter, which flew the shuttle fleet's last mission in July 2011,

11
00:00:49,010 --> 00:00:53,210

\h is already positioned inside the structure so
workers can put the finishing
