

1
00:00:06,740 --> 00:00:36,030

Music

2
00:00:36,030 --> 00:00:37,960

Ed Mango/NASA Commercial Crew Program: As humans, we all want to explore.

3
00:00:37,960 --> 00:00:40,620

So as a planet we want to explore. It doesn't really matter

4
00:00:40,620 --> 00:00:46,120

what country you're from. But we as Americans have always been ones to stand up and say we want to

5
00:00:46,120 --> 00:00:52,920

be the leaders of our efforts. We want to be the leaders of our exploration.

6
00:00:52,920 --> 00:00:56,940

Dan Ciccateri/SNC: I think it is extremely important that the U.S. once again regain its

7
00:00:56,940 --> 00:01:05,230

supremacy in space. Not from a 'lorded over everybody,' but just from a 'we have the capability'

8
00:01:05,230 --> 00:01:10,360

and it is something we should not give up.

9
00:01:10,360 --> 00:01:13,490

John Mulholland/Boeing: It's incredibly important both strategically and tactically for the United States

10
00:01:13,490 --> 00:01:19,370

to have domestic crew launch capability.

11
00:01:19,370 --> 00:01:24,460

Adam Harris/SpaceX: The importance of launching the American flag right here from U.S. soil is critically

12
00:01:24,460 --> 00:01:30,930

important for this industry, for the space program.

13
00:01:30,930 --> 00:01:36,650

Ciccateri/SNC: Space is the next frontier and so we need to be providing our knowledge and experience

14

00:01:36,650 --> 00:01:43,330

going forward. And we need to be leveraging our skills and industry base to do so.

15

00:01:43,330 --> 00:01:49,380

Harris/SpaceX: I think this program has been a great step by NASA to make sure that

16

00:01:49,380 --> 00:01:54,240

three great partners in industry can develop the Commercial Crew Program.

17

00:01:54,240 --> 00:02:00,560

It's to be seen what future markets will come from that.

18

00:02:00,560 --> 00:02:05,600

Mulholland/Boeing: I think you're going to see a lot of movement in the coming years as we get closer

19

00:02:05,600 --> 00:02:10,530

to fielding hardware and flying, you see a lot more energy and excitement
