

1
00:00:00,299 --> 00:00:00,329
George Diller, NASA Launch Commentator

2
00:00:00,329 --> 00:00:06,720
We're going to look briefly at some video
of the rollback of the mobile service tower,

3
00:00:06,720 --> 00:00:12,440
the gantry, as it moved back away from the
Delta II at about 8:15 Pacific time this

4
00:00:12,440 --> 00:00:19,440
evening.

5
00:00:46,929 --> 00:00:53,929
The Delta rocket as we see it here is approximately
128 feet tall. It's 8 feet in diameter

6
00:00:56,940 --> 00:01:03,940
with a 10-foot fairing and at liftoff it will
weigh 330,000 pounds.

7
00:01:07,310 --> 00:01:14,310
It has three strap-on solid rocket boosters
that will ignite at liftoff.

8
00:01:17,690 --> 00:01:23,030
That's a brief time lapse of our tower rollback
this evening, which once again occurred

9
00:01:23,030 --> 00:01:26,560
about 8:15 p.m. tonight.
