

**Upgrading for the Future**

1  
00:00:00,380 --> 00:00:01,380

Hey!

2  
00:00:01,380 --> 00:00:07,070

I'm NASA Kennedy's Yves Lamothe, taking you  
Inside KSC!

3  
00:00:07,070 --> 00:00:11,680

With ground now officially broken for Kennedy's  
new central campus, construction of KSC's

4  
00:00:11,680 --> 00:00:15,460

new eco-friendly Headquarters building is  
set to begin next month.

5  
00:00:15,460 --> 00:00:19,960

When it's completed two years from now, the  
200-thousand-square-foot facility, rising

6  
00:00:19,960 --> 00:00:25,070

seven stories near where Headquarters now  
sits, will house 500 employees and significantly

7  
00:00:25,070 --> 00:00:28,589

reduce KSC's annual energy bill.

8  
00:00:28,589 --> 00:00:33,370

Now that it's been lowered to the VAB floor,  
one of the iconic building's mammoth cranes

9  
00:00:33,370 --> 00:00:35,180

is ready for upgrading.

10  
00:00:35,180 --> 00:00:40,890

The 175-ton structure that helped stack shuttles  
for launch -- will do the same for NASA's

11  
00:00:40,890 --> 00:00:44,990

new Space Launch System and Orion.

12  
00:00:44,990 --> 00:00:48,170  
And this year's Combined Federal Campaign  
is under way!

13  
00:00:48,170 --> 00:00:51,920
