SPACEPORT

MAGAZINE

January 2015 Vol. 2 No. 1

1

00:00:00,220 --> 00:00:05,120

Hey, I'm NASA Kennedy's Michelle Crowe,
taking you Inside KSC!

2

00:00:07,319 --> 00:00:13,309

The first launch of 2015 saw a SpaceX Falcon
9 roar off the launch pad at Cape Canaveral

3

00:00:13,309 --> 00:00:14,799

Air Force Station.

4

00:00:14,800 --> 00:00:20,250

Its Dragon capsule delivered almost three
tons of supplies, equipment and science experiments

5

00:00:20,250 --> 00:00:21,890

to the International Space Station.

6

00:00:22,990 --> 00:00:27,810

This Dragon mission ups the total of cargo
delivered to the station by SpaceX to more

7

00:00:27,810 --> 00:00:32,070

than nine tons, much of which was processed
here at Kennedy for launch.

8

00:00:33,050 --> 00:00:39,469

This included experiments such as BRIC-19
and 20, along with VEGGE, a project to grow

9

00:00:39,469 --> 00:00:42,010

lettuce on the station.

10

00:00:42,010 --> 00:00:47,899

More processing is expected here at KSC as
CASIS and others plan new experiments in microgravity

11

00:00:47,899 --> 00:00:49,559

aboard the ISS.
