# SPACEPORT

magazine

EARTH RIGHT NOW

1

00:00:00,070 --> 00:00:02,489

HOST: Hi, I'm NASA Kennedy's Jason Hopkins,

2

00:00:02,489 --> 00:00:05,149

taking you Inside KSC!

3

00:00:06,860 --> 00:00:12,820

Launch Commentator: And liftoff. The Falcon takes flight.

4

00:00:12,820 --> 00:00:17,520

HOST: The liftoff of NOAA's DSCOVR spacecraft is the latest of three missions in which Kennedy's

5

00:00:17,529 --> 00:00:20,699

teams have played a role in this young year.

6

00:00:20,699 --> 00:00:27,289

While CRS-5 brought cargo to the ISS, and SMAP is mapping soil moisture from Earth orbit,

7

00:00:27,289 --> 00:00:29,279

DSCOVR will sit in deep space.

8

00:00:29,279 --> 00:00:33,739

It'll use NASA instruments to warn of potentially damaging space weather headed our way from

9

00:00:33,740 --> 00:00:34,660

the sun.

10

00:00:34,670 --> 00:00:38,930

HOST: Make it personal!, was the theme of this year's Safety and Health Week.

11

00:00:38,930 --> 00:00:43,550

And, one way you can start down the road to better health is on your bicycle!
