

KENNEDY SPACE CENTER'S

SPACEPORT

magazine

1

00:00:00,640 --> 00:00:06,759

Hey, I'm NASA Kennedy's Courtney Cannon, taking you Inside KSC!

2

00:00:06,759 --> 00:00:13,440

Construction is officially under way at Space Launch Complex 41 for a crew access tower

3

00:00:13,440 --> 00:00:19,900

for Boeing's CST-100 spacecraft atop the United Launch Alliance Atlas V.

4

00:00:19,900 --> 00:00:23,300

Astronauts and their support staff will use the tower to climb inside the spacecraft for

5

00:00:23,310 --> 00:00:26,330

launches to the International Space Station.

6

00:00:27,440 --> 00:00:31,880

The Swarmies are back at it, roving around the Launch Control Center parking lot to see

7

00:00:31,880 --> 00:00:38,319

if the search habits of ants are indeed the best way for robots on Mars to seek out resources

8

00:00:38,320 --> 00:00:41,199

astronauts can utilize on future journeys.

9

00:00:41,199 --> 00:00:45,039

When you're working with real robots, they surprise you every single day.

10

00:00:45,040 --> 00:00:48,420

They're like children sometimes where sometimes they obey and do exactly

11

00:00:48,420 --> 00:00:49,940

what you want them to do

12

00:00:49,940 --> 00:00:53,199

and sometimes they're off in their own world.
