

KENNEDY SPACE CENTER'S
SPACEPORT
m a g a z i n e

1

00:00:00,599 --> 00:00:05,680

Hey, I'm NASA Kennedy's Margaret Truitt.

Taking you Inside KSC!

2

00:00:05,680 --> 00:00:12,680

NASA's Magnetospheric MultiScale mission lifted off last Thursday night, lighting up the Space

3

00:00:12,700 --> 00:00:18,540

Coast for miles. Riding aloft on the power of a United Launch Alliance Atlas V, the four

4

00:00:18,540 --> 00:00:23,230

observatories of the MMS mission detached into their proper orbits to begin flying in

5

00:00:23,230 --> 00:00:24,920

a tight formation around Earth.

6

00:00:26,220 --> 00:00:30,360

Kennedy's reach extended into the asteroid belt between Mars and Jupiter recently when

7

00:00:30,360 --> 00:00:36,420

the Dawn spacecraft went into orbit around Ceres, a dwarf planet inside the belt.

8

00:00:36,420 --> 00:00:41,870

The Launch Services Program launched the revolutionary Dawn spacecraft from Cape Canaveral in September

9

00:00:41,870 --> 00:00:45,499

2007 aboard a Delta II rocket.

10

00:00:45,499 --> 00:00:51,269

Dawn orbited the asteroid Vesta in 2011 before venturing to Ceres.
