

**Reorganization Structure in Place**

1

00:00:00,799 --> 00:00:04,859

Hey I'm NASA Kennedy's Nancy Bray, taking you Inside KSC!

2

00:00:04,859 --> 00:00:12,120

More than a year of diligent thinking and careful planning with an eye on future needs

3

00:00:12,120 --> 00:00:16,360

produced a new structure for KSC's organizations and work force.

4

00:00:16,360 --> 00:00:21,570

The arrangement was made to streamline operations and better align the unique abilities of the

5

00:00:21,570 --> 00:00:23,679

center's corps of employees.

6

00:00:23,679 --> 00:00:30,210

The reorganization comes as the center transforms to a spaceport suitable for use by many users

7

00:00:30,210 --> 00:00:34,400

without sacrificing NASA's missions of exploration.

8

00:00:34,400 --> 00:00:39,000

The University of Alabama claimed the highest honors during the Robotics Mining Competition

9

00:00:39,000 --> 00:00:40,129

at KSC.

10

00:00:40,129 --> 00:00:45,550

Engineering teams built mobile machines capable of collecting soil either on their own or

11

00:00:45,550 --> 00:00:51,179

with limited remote control in rough simulations

of conditions they would face when operating

12

00:00:51,179 --> 00:00:53,190

on another world.
